## NOTES ON NEWS OF THE DAY.

UTAH'S wool crop for 1889 is 12,000,000 pounds worth on the average 17½ cents a pound. When Utah can raise more wool and less shame she will get into the Union.

THE Idaho Constitutional Convention has secured a Republican organization. Idaho expects the next Congress to let her into the Union. The Convention is in session at Boise City.

THE Sullivan-Kilrain party spent $100,000 in New Orleans. This greased the wheels of their trains sufficiently to carry them through the city while Gov. Nicholls took his extra morning nap.

SENATOR INGALLS says everybody is satisfied with Prohibition in Kansas, "because the Prohibitionists have their law, and the boys have their whisky." This was the way it worked in Rhode Island till the Prohibitionists lost their law.

HIAL D. MILLER, Cashier of the National bank at Malta, Ohio, is $32,000 short in his accounts and absent from town. Lewis Charriere, agent of the American Express Company at Houghton, Mich., is $20,000 short and also out of town. Both are wanted at home.

DAWSON, who was murdered by McDow in Charleston, is found to have changed his name on coming to this country. In England he was known as Francis W. Reeks, and it is stated that Rev. Father Reeks, a Catholic priest in Charleston, is his brother. Why Reeks changed his name is not explained, as he was never guilty of disreputable acts in England.

COMMISSIONER TANNER thinks a service pension would drain the treasury, as there are 1,200,000 veterans and only 350,000 pensions. It is easy to compute the additional cost if pensions of $8 per month were given to all who are not yet pensioned. The Commissioner is in favor of dealing liberally with all who need pensions and are entitled to them under the present law.

THE rice planters on the Savannah river threaten to lynch Bell, the pretended Christ of the negroes. The latter are flocking to him in all directions, leaving their homes and crops, to go to the promised land. He tells them that he has sent for a car load of angel's wings, and expects them every hour. He promises them relief from work as soon as they get to the "land of Canaan."

ARTIE SHIRLEY of Washington became despondent over the death of his sweetheart a month ago, and yesterday threw himself under a freight train crossing the Potomac bridge. Death was instantaneous. The locomotive is daily demonstrating its reliability as a machine for executing malefactors. Gov. Hill can hardly fail to ignore it in his next message if electricity proves a failure.

IT transpires that the "Pigs in Clover" puzzle was patented over ten years ago. But the humble citizen of Waverly, N. Y., who recently brought it out, managed to stow away about $100,000 before the original inventor found out what he was doing. He then stopped him with an injunction, but could not deprive him of his fortune. The first man had the genius to invent it, but the other knew how to put it on the market.

QUEEN VICTORIA has asked for more money to support two members of her royal family who wish to set up households of their own. The family now draws something over £540,000 ($2,700,000) annually from the British treasury, and the tax-payers begin to ask if it is not about time to call a halt, especially as the present rate of increase is likely to make the royal family one-half the population of the kingdom in a few more decades.

A JOHNSTOWN Coroner's jury decided yesterday that Ellen Hite, one of the victims of the flood, came to her death by the breaking of the South Fork dam, and that the owners of the dam were culpable in not making it secure. This is the verdict of common sense in every one of the 10,000 cases. But what do the courts propose to do about it? Will they send the owners to prison or leave them to rebuild the dam?

THE news that Pope Leo has decided to leave the Vatican and remove to Spain is pretty well authenticated, and yet is likely to prove untrue. There is an immense amount of wealth to leave behind which the government would undoubtedly seize and place beyond recovery by the church. The "prisoner of the Vatican" is a very wise old man, and Spain is not rich enough to make good the property that he would sacrifice.

ONE of the "fancy" whom the Philadelphia *Times'* correspondent found yesterday among the Sullivan crowd at New Orleans was a determined looking man from the West who had killed twenty-two men. He is trying to rival his partner in the gambling business who has twenty-four notches on the handle of his pistol. Less determined looking and less important men were with him to the number of five, each of whom had filled at least four graves. The correspondent talked with not less than 500 men from different parts of the country who had an interest in some cemetery to the amount of one life or more.

IT is more than a month since the Johnstown calamity, and the distribution of the fund created by universal benevolence is about to begin. Gov. Beaver's Commission has $2,000,000 within reach, and there is $700,000 more tied up by red tape. The sufferers have been divided into six classes. In the first class are 205 women who are left without husbands and with large families. These will receive $1,000 each. Classes two to five are less destitute, and will receive from $600 down to $200. The sum of $1,186,000 is to be disbursed immediately to 8,680 families, an average of $322 each. Class six includes the heaviest losers, but they are not in immediate want, and their cases will be considered afterwards. After this distribution is made there will remain $1,600,000.

### BRUISER SULLIVAN WON THAT FIGHT.

**A Large Crowd Witnessed Him Hammer Kilrain—There was "No Disturbance."**

Bruiser John L. Sullivan whipped Bruiser Jacob Kilrain down in the South to-day. In all 72 rounds were fought. There was no "disturbing element" at the fight. The following suffices to give the doings of the contestants and their admirers:

**POINTS ABOUT THE FIGHT.**

By Telegraph to The Freeman.

BOSTON, July 8.—Newspaper Row was packed with humanity this forenoon, and the interest in the bulletins from the prize ring was much greater than that displayed on the night of the Prohibition election, and equal to that manifested at many State elections. When a bulletin giving the report that Sullivan had won was displayed the vast crowd swung their hats, jumped into the air and cheered. Sullivan's father, who appeared on the scene, was followed by a yelling crowd and cheered loudly. When he finally took a car for his home in the Highlands a crowd of men and boys followed him on a dog trot for some distance, shouting and cheering.

NEW ORLEANS, July 8.—Gov. Nicholls last night issued another proclamation ordering the State officials to stop the fight. About 11 o'clock P. M. carriages lined either side of St. Charles, Royal and Canal-streets. They were all filled with excursionists bound for the Queen & Crescent Railroad depot. By 12 o'clock the depot was filled with the holders of $15-tickets to the prize fight. There were 715 of these tickets sold by the Railroad Company, and probably 200 were given to the personal friends of the pugilists. The train pulled out promptly at 1 o'clock, and so quietly that only those near by were aware of its departure. The crowd left about the grounds and the depot was by this time so great that passers-by were compelled to elbow their way. The second train, consisting of all coaches, and containing nearly 800 excursionists, left shortly after 2 A. M. The first train reached the battle ground at Richburg, Miss., 103 miles from New-Orleans, at about 4 A. M., and the second train an hour later. The crowd about the depot was quiet and orderly.

There is only one telegraph wire along the division of the Queen & Crescent Road which runs near the scene of the fight. This wire is under the control of the Railroad Company, and is entirely taken up with railway business. The Company refuse to take any press dispatches.

Richburg, where the fight took place, is virtually owned by J. Rich, and the place covers an area of 10,000 acres, extending over three counties of Mississippi. Mr. Rich is the owner of an extensive saw-mill, and this place was picked out simply because of the bars it offered to intrusion. Last night a body of 160 men went to work by the aid of bon-fires to perfect the battle ground, which is on the sawdust of the mill and seats for 1,500 people were constructed. The owner of the property had made excellent arrangements for the pugilists, and room on the property was provided for Kilrain. Quarters were also fitted up for Sullivan and party. In these apartments the men spent the last night before the fight. At the Mississippi line there was a party of 25 armed men and the train was flagged but no attention was paid to the signal and the special dashed by. It was just before daybreak when the train got into Mississippi.

The regular train on the Northeastern road arrived 1:40 this afternoon, which passed Richburg at 9:30 A. M. Passengers report that the fighters had just entered the ring at that hour.

RICHBURG, Miss., July 8.—The "fight train" arrived early this morning. After worrying around for half the night and speculating on the chances for a fight, people at the hotels, clubs and on the streets moved with common impulse toward the depot. At 11:30 o'clock people trusted not to street cars but took cabs and carriages and every jehu in the City did a land-office business. Down at the depot there was an indescribable crush. It seemed as though everybody in the City was going to the fight, and it happened that everybody wanted to get aboard at the same time. Through careless management holders of inner-ring tickets who paid dearly for their trip were forced to go through a narrow passage-way well guarded with policemen to reach the cars. At this small opening several hundred people congregated and jostled, pushed and fought to secure admission. Clothes were torn, hats crushed and nervous people shocked but the crowd finally got through and the seven cars of the select train were quickly filled. The greatest difficulty was experienced by the management in keeping people without tickets off the train and a force of detectives was provided in each car. Some venturesome people who had no money to pay their way risked their lives on the roofs of the cars and it required the strictest watching to discover all who hung on the trucks and other dangerous portions of the coaches.

Just before the train was made up Attorney-General Rogers came aboard with Adjutant-General Faires and Colonel Clem Walker, of the Governor's Staff, and stated that the fight must positively not take place on Louisiana soil. At first no answer was made, but the officials were finally told that the men would not fight in that State. It was expected that troops would appear at the depot, but of the two companies in the City one could muster but 40 men, and the other only a baker's dozen. In reply to a requisition made to them by the Governor for train accommodations for troops, the Railroad officials replied that the State could not be accommodated, since all their rolling stock had been chartered. The Governor, however, was offered transportation with his men on the regular train. Donovan and Murphy were on the train when Kilrain left the City yesterday. All their baggage, Stronia water, etc., were left behind, and Kilrain had to use other water, which it was feared might hurt his condition. At 1:30 the first train with 12 coaches pulled out, and the conductor and engineer were given orders to go straight through to the battle ground without a stop. Aboard the train the information was furnished officially that both men had reached the battle ground at 6:30. There was scarcely any betting at all on the train. Passengers simply talked over the merits of the two men and slept. On the way over many shots were fired in order to frighten off stealers of rides, and the conductors found many tough characters secreted in closets and other out-of-the-way places. The discovery of one group of these non-ticket-holders almost precipitated a shooting affray, but the trouble was avoided by the ejectment of the sneaks. On the train coming over were the Chief of Police of New Orleans, the Commissioner of Public Buildings, and, in fact, most of the prominent officials of the City. The Attorney-General left the car at Slidell, and stood at the railway depot until morning, waiting for a returning train.

The ring was built about one-eighth of a mile from the railroad in a pretty spot with tall pines all around. The ground is level and covered with green turf. The ring was made of heavy ropes run through stakes deeply driven into the ground. There were square seats on the four sides of the ring.

CINCINNATI, July 8.—There is no direct wire between Cincinnati and the battle ground in Mississippi. The Western Union made no arrangement for a special wire owing to a lack of courtesy shown them by the managers. From a reliable source the news has reached here that Sullivan won in the seventy-second round and that the special train left Richburg for New-Orleans at 1:30. There will be no stop. Reports of the fight will be filed when the train reaches New-Orleans.

ST. LOUIS, July 8.—The *Post Despatch* has a special from New-Orleans which says the latest news there is that Sullivan won in the seventy-second round.

BALTIMORE, July 8.—A dispatch to the *Sun* from Cincinnati, through which place the New-Orleans wires pass, says: "Sullivan whipped Kilrain in 72 rounds. Fight ended at 1:10."

BALTIMORE, July 8.—The *American* prints the following Richburg dispatch: "The fight has ended and Sullivan was declared winner at the end of the seventy-second round. This news comes from excellent authority and is considered authentic."

ON-THE-TRAIN, July 8.—The temper of the crowd was for the best man to win. The weather was sultry and warm.

The brutal contest was witnessed by a large crowd. It is stated there was "no disturbance," a desire being shown to have "fair play on both sides."

THE LATEST.

Sullivan won in 72 rounds.

Both men have been arrested by the Sheriff.

### THE STOCK AND MONEY MARKET.

**Financial Doings on Wall-Street To-Day—The Leading Closing Quotations.**

By Telegraph to The Freeman.

NEW-YORK, July 8.—The weakness prevalent in the stock market on Saturday was renewed this morning, and notwithstanding the strength of the London market further declines extending to 1¼ per cent. were established throughout the list. First prices as compared with Saturday's closing figures were almost invariably lower and the losses extended to ⅝ per cent., with Rock Island leading and the other grangers following closely. There was an active and well distributed business in the leading shares, but St. Paul, Lake Shore, Union Pacific, Reading, New-England, Atchison and Lead Trust were most conspicuous. The early dealings also developed marked weakness and at the lowest points Sugar was 1⅝ from Saturday's figures, Lake Shore, Louis & Nashville 1¼, Atchison and Union Pacific 1¼, Lead Trust 1 per cent., Lackawanna ⅞ and others smaller fractions. There was some reaction after the half hour was past and the market became more quiet, but later the downward movement was resumed. At 11 o'clock the market was fairly active and weak.

### CHIPPEWA INDIANS ARE STUBBORN.

**They Cannot be Induced by Commissioners to Leave Their Reservation.**

By Telegraph to The Freeman.

RED LAKE RESERVATION, Minn., July 8.—The Commissioners appointed to negotiate with the Chippewas for the opening of their reservation have had three councils with the Indians. Yesterday the leaders of the bands on the reservation were present. Neganmagred, who had been delegated to act as spokesman, said the plan set forth in the act of Congress was a failure. Each member of the Commission made an address, calling the attention of the Indians to the fact that they had been receiving for 10 years annually $10,000 from the Government in the form of annuities; that they were becoming poorer every year, and that the only resource open to them was to accept the liberal terms of the Government.

The Indians complained that they were blamed for the destruction of their pine lands by fire, when, as a matter of fact, the forest fires were always started by whites, and that the whites came upon their reservation and cut timber while the Indians were not allowed to leave their homes to go to the white man's country without a pass from the agent. They also objected to the money being allowed to accumulate in the United States Treasury from the sale of their lands, claiming that their lands were more valuable, and that they wished the entire benefit arising from such sales. After further explanations by the Commissioners and additional assurances on the part of the Chippewas that they regretted they could not accept the terms of the act, it was agreed that another meeting should be held to-morrow. There is little probability of the leaders changing their minds.

**Killed by the Highbinders.**

By Telegraph to The Freeman.

SAN FRANCISCO, July 8.—Lue Ah Sing was killed in a Jackson-Street Chinese Theatre last night in a Highbinder quarrel. The assailants were armed with hatchets, revolvers and iron bars, and entered the Theatre during the performance and attacked Sing. His head was chopped almost into mincemeat. Sing's cousin was also badly cut. The quarrel is supposed to be a continuation of the Highbinder war which is being waged in Chinatown between different societies.

**Another Comet Discovered.**

By Telegraph to The Freeman.

GENEVA, July 8.—Professr Brooks, Director of the Brooks Observatory, discovered a new comet last night, and confirmed his discovery by a second observation this morning. Its position is right ascension 23 hours 45 minutes, declination south nine degrees 10 minutes. The comet is moving slowly in a north-easterly direction.

## NOTES ON NEWS OF THE DAY.

UTAH'S wool crop for 1889 is 12,000,000 pounds worth on the average 17½ cents a pound. When Utah can raise more wool and less shame she will get into the Union.

THE Idaho Constitutional Convention has secured a Republican organization. Idaho expects the next Congress to let her into the Union. The Convention is in session at Boise City.

THE Sullivan-Kilrain party spent $100,000 in New Orleans. This greased the wheels of their trains sufficiently to carry them through the city while Gov. Nicholls took his extra morning nap.

SENATOR INGALLS says everybody is satisfied with Prohibition in Kansas, "because the Prohibitionists have their law, and the boys have their whisky." This was the way it worked in Rhode Island till the Prohibitionists lost their law.

HIAL D. MILLER, Cashier of the National bank at Malta, Ohio, is $32,000 short in his accounts and absent from town. Lewis Charriere, agent of the American Express Company at Houghton, Mich., is $20,000 short and also out of town. Both are wanted at home.

DAWSON, who was murdered by McDow in Charleston, is found to have changed his name on coming to this country. In England he was known as Francis W. Reeks, and it is stated that Rev. Father Reeks, a Catholic priest in Charleston, is his brother. Why Reeks changed his name is not explained, as he was never guilty of disreputable acts in England.

COMMISSIONER TANNER thinks a service pension would drain the treasury, as there are 1,200,000 veterans and only 350,000 pensions. It is easy to compute the additional cost if pensions of $8 per month were given to all who are not yet pensioned. The Commissioner is in favor of dealing liberally with all who need pensions and are entitled to them under the present law.

THE rice planters on the Savannah river threaten to lynch Bell, the pretended Christ of the negroes. The latter are flocking to him in all directions, leaving their homes and crops, to go to the promised land. He tells them that he has sent for a car load of angel's wings, and expects them every hour. He promises them relief from work as soon as they get to the "land of Canaan."

ARTIE SHIRLEY of Washington became despondent over the death of his sweetheart a month ago, and yesterday threw himself under a freight train crossing the Potomac bridge. Death was instantaneous. The locomotive is daily demonstrating its reliability as a machine for executing malefactors. Gov. Hill can hardly fail to ignore it in his next message if electricity proves a failure.

IT transpires that the "Pigs in Clover" puzzle was patented over ten years ago. But the humble citizen of Waverly, N. Y., who recently brought it out, managed to stow away about $100,000 before the original inventor found out what he was doing. He then stopped him with an injunction, but could not deprive him of his fortune. The first man had the genius to invent it, but the other knew how to put it on the market.

QUEEN VICTORIA has asked for more money to support two members of her royal family who wish to set up households of their own. The family now draws something over £540,000 ($2,700,000) annually from the British treasury, and the tax-payers begin to ask if it is not about time to call a halt, especially as the present rate of increase is likely to make the royal family one-half the population of the kingdom in a few more decades.

A JOHNSTOWN Coroner's jury decided yesterday that Ellen Hite, one of the victims of the flood, came to her death by the breaking of the South Fork dam, and that the owners of the dam were culpable in not making it secure. This is the verdict of common sense in every one of the 10,000 cases. But what do the courts propose to do about it? Will they send the owners to prison or leave them to rebuild the dam?

THE news that Pope Leo has decided to leave the Vatican and remove to Spain is pretty well authenticated, and yet is likely to prove untrue. There is an immense amount of wealth to leave behind which the government would undoubtedly seize and place beyond recovery by the church. The "prisoner of the Vatican" is a very wise old man, and Spain is not rich enough to make good the property that he would sacrifice.

ONE of the "fancy" whom the Philadelphia *Times'* correspondent found yesterday among the Sullivan crowd at New Orleans was a determined looking man from the West who had killed twenty-two men. He is trying to rival his partner in the gambling business who has twenty-four notches on the handle of his pistol. Less determined looking and less important men were with him to the number of five, each of whom had filled at least four graves. The correspondent talked with not less than 500 men from different parts of the country who had an interest in some cemetery to the amount of one life or more.

IT is more than a month since the Johnstown calamity, and the distribution of the fund created by universal benevolence is about to begin. Gov. Beaver's Commission has $2,000,000 within reach, and there is $700,000 more tied up by red tape. The sufferers have been divided into six classes. In the first class are 205 women who are left without husbands and with large families. These will receive $1,000 each. Classes two to five are less destitute, and will receive from $600 down to $200. The sum of $1,186,000 is to be disbursed immediately to 8,680 families, an average of $322 each. Class six includes the heaviest losers, but they are not in immediate want, and their cases will be considered afterwards. After this distribution is made there will remain $1,600,000.

### BRUISER SULLIVAN WON THAT FIGHT.

**A Large Crowd Witnessed Him Hammer Kilrain—There was "No Disturbance."**

Bruiser John L. Sullivan whipped Bruiser Jacob Kilrain down in the South to-day. In all 72 rounds were fought. There was no "disturbing element" at the fight. The following suffices to give the doings of the contestants and their admirers:

**POINTS ABOUT THE FIGHT.**

By Telegraph to The Freeman.

BOSTON, July 8.—Newspaper Row was packed with humanity this forenoon, and the interest in the bulletins from the prize ring was much greater than that displayed on the night of the Prohibition election, and equal to that manifested at many State elections. When a bulletin giving the report that Sullivan had won was displayed the vast crowd swung their hats, jumped into the air and cheered. Sullivan's father, who appeared on the scene, was followed by a yelling crowd and cheered loudly. When he finally took a car for his home in the Highlands a crowd of men and boys followed him on a dog trot for some distance, shouting and cheering.

NEW ORLEANS, July 8.—Gov. Nicholls last night issued another proclamation ordering the State officials to stop the fight. About 11 o'clock P. M. carriages lined either side of St. Charles, Royal and Canal-streets. They were all filled with excursionists bound for the Queen & Crescent Railroad depot. By 12 o'clock the depot was filled with the holders of $15-tickets to the prize fight. There were 715 of these tickets sold by the Railroad Company, and probably 200 were given to the personal friends of the pugilists. The train pulled out promptly at 1 o'clock, and so quietly that only those near by were aware of its departure. The crowd left about the grounds and the depot was by this time so great that passers-by were compelled to elbow their way. The second train, consisting of all coaches, and containing nearly 800 excursionists, left shortly after 2 A. M. The first train reached the battle ground at Richburg, Miss., 103 miles from New-Orleans, at about 4 A. M., and the second train an hour later. The crowd about the depot was quiet and orderly.

There is only one telegraph wire along the division of the Queen & Crescent Road which runs near the scene of the fight. This wire is under the control of the Railroad Company, and is entirely taken up with railway business. The Company refuse to take any press dispatches.

Richburg, where the fight took place, is virtually owned by J. Rich, and the place covers an area of 10,000 acres, extending over three counties of Mississippi. Mr. Rich is the owner of an extensive saw-mill, and this place was picked out simply because of the bars it offered to intrusion. Last night a body of 160 men went to work by the aid of bon-fires to perfect the battle ground, which is on the sawdust of the mill and seats for 1,500 people were constructed. The owner of the property had made excellent arrangements for the pugilists, and room on the property was provided for Kilrain. Quarters were also fitted up for Sullivan and party. In these apartments the men spent the last night before the fight. At the Mississippi line there was a party of 25 armed men and the train was flagged but no attention was paid to the signal and the special dashed by. It was just before daybreak when the train got into Mississippi.

The regular train on the Northeastern road arrived 1:40 this afternoon, which passed Richburg at 9:30 A. M. Passengers report that the fighters had just entered the ring at that hour.

RICHBURG, Miss., July 8.—The "fight train" arrived early this morning. After worrying around for half the night and speculating on the chances for a fight, people at the hotels, clubs and on the streets moved with common impulse toward the depot. At 11:30 o'clock people trusted not to street cars but took cabs and carriages and every jehu in the City did a land-office business. Down at the depot there was an indescribable crush. It seemed as though everybody in the City was going to the fight, and it happened that everybody wanted to get aboard at the same time. Through careless management holders of inner-ring tickets who paid dearly for their trip were forced to go through a narrow passage-way well guarded with policemen to reach the cars. At this small opening several hundred people congregated and jostled, pushed and fought to secure admission. Clothes were torn, hats crushed and nervous people shocked but the crowd finally got through and the seven cars of the select train were quickly filled. The greatest difficulty was experienced by the management in keeping people without tickets off the train and a force of detectives was provided in each car. Some venturesome people who had no money to pay their way risked their lives on the roofs of the cars and it required the strictest watching to discover all who hung on the trucks and other dangerous portions of the coaches.

Just before the train was made up Attorney-General Rogers came aboard with Adjutant-General Faires and Colonel Clem Walker, of the Governor's Staff, and stated that the fight must positively not take place on Louisiana soil. At first no answer was made, but the officials were finally told that the men would not fight in that State. It was expected that troops would appear at the depot, but of the two companies in the City one could muster but 40 men, and the other only a baker's dozen. In reply to a requisition made to them by the Governor for train accommodations for troops, the Railroad officials replied that the State could not be accommodated, since all their rolling stock had been chartered. The Governor, however, was offered transportation with his men on the regular train. Donovan and Murphy were on the train when Kilrain left the City yesterday. All their baggage, Stronia water, etc., were left behind, and Kilrain had to use other water, which it was feared might hurt his condition. At 1:30 the first train with 12 coaches pulled out, and the conductor and engineer were given orders to go straight through to the battle ground without a stop. Aboard the train the information was furnished officially that both men had reached the battle ground at 6:30. There was scarcely any betting at all on the train. Passengers simply talked over the merits of the two men and slept. On the way over many shots were fired in order to frighten off stealers of rides, and the conductors found many tough characters secreted in closets and other out-of-the-way places. The discovery of one group of these non-ticket-holders almost precipitated a shooting affray, but the trouble was avoided by the ejectment of the sneaks. On the train coming over were the Chief of Police of New Orleans, the Commissioner of Public Buildings, and, in fact, most of the prominent officials of the City. The Attorney-General left the car at Slidell, and stood at the railway depot until morning, waiting for a returning train.

The ring was built about one-eighth of a mile from the railroad in a pretty spot with tall pines all around. The ground is level and covered with green turf. The ring was made of heavy ropes run through stakes deeply driven into the ground. There were square seats on the four sides of the ring.

CINCINNATI, July 8.—There is no direct wire between Cincinnati and the battle ground in Mississippi. The Western Union made no arrangement for a special wire owing to a lack of courtesy shown them by the managers. From a reliable source the news has reached here that Sullivan won in the seventy-second round and that the special train left Richburg for New-Orleans at 1:30. There will be no stop. Reports of the fight will be filed when the train reaches New-Orleans.

ST. LOUIS, July 8.—The *Post Despatch* has a special from New-Orleans which says the latest news there is that Sullivan won in the seventy-second round.

BALTIMORE, July 8.—A dispatch to the *Sun* from Cincinnati, through which place the New-Orleans wires pass, says: "Sullivan whipped Kilrain in 72 rounds. Fight ended at 1:10."

BALTIMORE, July 8.—The *American* prints the following Richburg dispatch: "The fight has ended and Sullivan was declared winner at the end of the seventy-second round. This news comes from excellent authority and is considered authentic."

ON-THE-TRAIN, July 8.—The temper of the crowd was for the best man to win. The weather was sultry and warm.

The brutal contest was witnessed by a large crowd. It is stated there was "no disturbance," a desire being shown to have "fair play on both sides."

THE LATEST.

Sullivan won in 72 rounds.

Both men have been arrested by the Sheriff.

### A SUMMARY OF INTERESTING NEWS.

**Some of the Happenings at Home and Abroad this Day.**

An epidemic of typhoid fever prevails in Wilkesbarre, Pa. It is believed that the heavy rains that fell about the time of the Johnstown disaster washed an unusually large quantity of animal and vegetable refuse into the streams from which the water supply is obtained. This refuse impregnated the whole water supply of the City.

During a thunder-storm yesterday afternoon, says a Uniontown, Pa., dispatch, a young woman living with J. Green, on Winona-street, received an electric shock while gathering clothes from a wire line. She was numb for two hours.

An anti-Jesuit meeting was held in Montreal last night. It was resolved to form branches of the Equal Rights Association throughout the Province of Quebec.

The crippled United States steamer Nipsic sailed from Samoa for Honolulu June 1, but was out of coal and anchored at Fanning Island to await a supply.

### THE STOCK AND MONEY MARKET.

**Financial Doings on Wall-Street To-Day—The Leading Closing Quotations.**

By Telegraph to The Freeman.

NEW-YORK, July 8.—The weakness prevalent in the stock market on Saturday was renewed this morning, and notwithstanding the strength of the London market further declines extending to 1¼ per cent. were established throughout the list. First prices as compared with Saturday's closing figures were almost invariably lower and the losses extended to ⅝ per cent., with Rock Island leading and the other grangers following closely. There was an active and well distributed business in the leading shares, but St. Paul, Lake Shore, Union Pacific, Reading, New-England, Atchison and Lead Trust were most conspicuous. The early dealings also developed marked weakness and at the lowest points Sugar was 1⅝ from Saturday's figures, Lake Shore, Louis & Nashville 1¼, Atchison and Union Pacific 1⅛, Lead Trust 1 per cent., Lackawanna ⅞ and others smaller fractions. There was some reaction after the half hour was past and the market became more quiet, but later the downward movement was resumed. At 11 o'clock the market was fairly active and weak.

### CHIPPEWA INDIANS ARE STUBBORN.

**They Cannot be Induced by Commissioners to Leave Their Reservation.**

By Telegraph to The Freeman.

RED LAKE RESERVATION, Minn., July 8.—The Commissioners appointed to negotiate with the Chippewas for the opening of their reservation have had three councils with the Indians. Yesterday the leaders of the bands on the reservation were present. Neganmagred, who had been delegated to act as spokesman, said the plan set forth in the act of Congress was a failure. Each member of the Commission made an address, calling the attention of the Indians to the fact that they had been receiving for 10 years annually $10,000 from the Government in the form of annuities; that they were becoming poorer every year, and that the only resource open to them was to accept the liberal terms of the Government.

The Indians complained that they were blamed for the destruction of their pine lands by fire, when, as a matter of fact, the forest fires were always started by whites, and that the whites came upon their reservation and cut timber while the Indians were not allowed to leave their homes to go to the white man's country without a pass from the agent. They also objected to the money being allowed to accumulate in the United States Treasury from the sale of their lands, claiming that their lands were more valuable, and that they wished the entire benefit arising from such sales. After further explanations by the Commissioners and additional assurances on the part of the Chippewas that they regretted they could not accept the terms of the act, it was agreed that another meeting should be held to-morrow. There is little probability of the leaders changing their minds.

**Killed by the Highbinders.**

By Telegraph to The Freeman.

SAN FRANCISCO, July 8.—Lue Ah Sing was killed in a Jackson-Street Chinese Theatre last night in a Highbinder quarrel. The assailants were armed with hatchets, revolvers and iron bars, and entered the Theatre during the performance and attacked Sing. His head was chopped almost into mincemeat. Sing's cousin was also badly cut. The quarrel is supposed to be a continuation of the Highbinder war which is being waged in Chinatown between different societies.

## NOTES ON NEWS OF THE DAY.

UTAH'S wool crop for 1889 is 12,000,000 pounds worth on the average 17½ cents a pound. When Utah can raise more wool and less shame she will get into the Union.

THE Idaho Constitutional Convention has secured a Republican organization. Idaho expects the next Congress to let her into the Union. The Convention is in session at Boise City.

THE Sullivan-Kilrain party spent $100,000 in New Orleans. This greased the wheels of their trains sufficiently to carry them through the city while Gov. Nicholls took his extra morning nap.

SENATOR INGALLS says everybody is satisfied with Prohibition in Kansas, "because the Prohibitionists have their law, and the boys have their whisky." This was the way it worked in Rhode Island till the Prohibitionists lost their law.

HIAL D. MILLER, Cashier of the National bank at Malta, Ohio, is $32,000 short in his accounts and absent from town. Lewis Charriere, agent of the American Express Company at Houghton, Mich., is $20,000 short and also out of town. Both are wanted at home.

DAWSON, who was murdered by McDow in Charleston, is found to have changed his name on coming to this country. In England he was known as Francis W. Reeks, and it is stated that Rev. Father Reeks, a Catholic priest in Charleston, is his brother. Why Reeks changed his name is not explained, as he was never guilty of disreputable acts in England.

COMMISSIONER TANNER thinks a service pension would drain the treasury, as there are 1,200,000 veterans and only 350,000 pensions. It is easy to compute the additional cost if pensions of $8 per month were given to all who are not yet pensioned. The Commissioner is in favor of dealing liberally with all who need pensions and are entitled to them under the present law.

THE rice planters on the Savannah river threaten to lynch Bell, the pretended Christ of the negroes. The latter are flocking to him in all directions, leaving their homes and crops, to go to the promised land. He tells them that he has sent for a car load of angel's wings, and expects them every hour. He promises them relief from work as soon as they get to the "land of Canaan."

ARTIE SHIRLEY of Washington became despondent over the death of his sweetheart a month ago, and yesterday threw himself under a freight train crossing the Potomac bridge. Death was instantaneous. The locomotive is daily demonstrating its reliability as a machine for executing malefactors. Gov. Hill can hardly fail to ignore it in his next message if electricity proves a failure.

IT transpires that the "Pigs in Clover" puzzle was patented over ten years ago. But the humble citizen of Waverly, N. Y., who recently brought it out, managed to stow away about $100,000 before the original inventor found out what he was doing. He then stopped him with an injunction, but could not deprive him of his fortune. The first man had the genius to invent it, but the other knew how to put it on the market.

QUEEN VICTORIA has asked for more money to support two members of her royal family who wish to set up households of their own. The family now draws something over £540,000 ($2,700,000) annually from the British treasury, and the tax-payers begin to ask if it is not about time to call a halt, especially as the present rate of increase is likely to make the royal family one-half the population of the kingdom in a few more decades.

A JOHNSTOWN Coroner's jury decided yesterday that Ellen Hite, one of the victims of the flood, came to her death by the breaking of the South Fork dam, and that the owners of the dam were culpable in not making it secure. This is the verdict of common sense in every one of the 10,000 cases. But what do the courts propose to do about it? Will they send the owners to prison or leave them to rebuild the dam?

THE news that Pope Leo has decided to leave the Vatican and remove to Spain is pretty well authenticated, and yet is likely to prove untrue. There is an immense amount of wealth to leave behind which the government would undoubtedly seize and place beyond recovery by the church. The "prisoner of the Vatican" is a very wise old man, and Spain is not rich enough to make good the property that he would sacrifice.

ONE of the "fancy" whom the Philadelphia *Times'* correspondent found yesterday among the Sullivan crowd at New Orleans was a determined looking man from the West who had killed twenty-two men. He is trying to rival his partner in the gambling business who has twenty-four notches on the handle of his pistol. Less determined looking and less important men were with him to the number of five, each of whom had filled at least four graves. The correspondent talked with not less than 500 men from different parts of the country who had an interest in some cemetery to the amount of one life or more.

IT is more than a month since the Johnstown calamity, and the distribution of the fund created by universal benevolence is about to begin. Gov. Beaver's Commission has $2,000,000 within reach, and there is $700,000 more tied up by red tape. The sufferers have been divided into six classes. In the first class are 205 women who are left without husbands and with large families. These will receive $1,000 each. Classes two to five are less destitute, and will receive from $600 down to $200. The sum of $1,186,000 is to be disbursed immediately to 3,680 families, an average of $322 each. Class six includes the heaviest losers, but they are not in immediate want, and their cases will be considered afterwards. After this distribution is made there will remain $1,600,000.

### BRUISER SULLIVAN WON THAT FIGHT.

**A Large Crowd Witnessed Him Hammer Kilrain—There was "No Disturbance."**

Bruiser John L. Sullivan whipped Bruiser Jacob Kilrain down in the South to-day. In all 72 rounds were fought. There was no "disturbing element" at the fight. The following suffices to give the doings of the contestants and their admirers:

**POINTS ABOUT THE FIGHT.**

By Telegraph to The Freeman.

BOSTON, July 8.—Newspaper Row was packed with humanity this forenoon, and the interest in the bulletins from the prize ring was much greater than that displayed on the night of the Prohibition election, and equal to that manifested at many State elections. When a bulletin giving the report that Sullivan had won was displayed the vast crowd swung their hats, jumped into the air and cheered. Sullivan's father, who appeared on the scene, was followed by a yelling crowd and cheered loudly. When he finally took a car for his home in the Highlands a crowd of men and boys followed him on a dog trot for some distance, shouting and cheering.

NEW ORLEANS, July 8.—Gov. Nicholls last night issued another proclamation ordering the State officials to stop the fight. About 11 o'clock P. M. carriages lined either side of St. Charles, Royal and Canal-streets. They were all filled with excursionists bound for the Queen & Crescent Railroad depot. By 12 o'clock the depot was filled with the holders of $15-tickets to the prize fight. There were 715 of these tickets sold by the Railroad Company, and probably 200 were given to the personal friends of the pugilists. The train pulled out promptly at 1 o'clock, and so quietly that only those near by were aware of its departure. The crowd left about the grounds and the depot was by this time so great that passers-by were compelled to elbow their way. The second train, consisting of all coaches, and containing nearly 800 excursionists, left shortly after 2 A. M. The first train reached the battle ground at Richburg, Miss., 103 miles from New-Orleans, at about 4 A. M., and the second train an hour later. The crowd about the depot was quiet and orderly.

There is only one telegraph wire along the division of the Queen & Crescent Road which runs near the scene of the fight. This wire is under the control of the Railroad Company, and is entirely taken up with railway business. The Company refuse to take any press dispatches.

Richburg, where the fight took place, is virtually owned by J. Rich, and the place covers an area of 10,000 acres, extending over three counties of Mississippi. Mr. Rich is the owner of an extensive saw-mill, and this place was picked out simply because of the bars it offered to intrusion. Last night a body of 160 men went to work by the aid of bon-fires to perfect the battle ground, which is on the sawdust of the mill and seats for 1,500 people were constructed. The owner of the property had made excellent arrangements for the pugilists, and room on the property was provided for Kilrain. Quarters were also fitted up for Sullivan and party. In these apartments the men spent the last night before the fight. At the Mississippi line there was a party of 25 armed men and the train was flagged but no attention was paid to the signal and the special dashed by. It was just before daybreak when the train got into Mississippi.

The regular train on the Northeastern road arrived 1:40 this afternoon, which passed Richburg at 9:30 A. M. Passengers report that the fighters had just entered the ring at that hour.

RICHBURG, Miss., July 8.—The "fight train" arrived early this morning. After worrying around for half the night and speculating on the chances for a fight, people at the hotels, clubs and on the streets moved with common impulse toward the depot. At 11:30 o'clock people trusted not to street cars but took cabs and carriages and every jehu in the City did a land-office business. Down at the depot there was an indescribable crush. It seemed as though everybody in the City was going to the fight, and it happened that everybody wanted to get aboard at the same time. Through careless management holders of inner-ring tickets who paid dearly for their trip were forced to go through a narrow passage-way well guarded with policemen to reach the cars. At this small opening several hundred people congregated and jostled, pushed and fought to secure admission. Clothes were torn, hats crushed and nervous people shocked but the crowd finally got through and the seven cars of the select train were quickly filled. The greatest difficulty was experienced by the management in keeping people without tickets off the train and a force of detectives was provided in each car. Some venturesome people who had no money to pay their way risked their lives on the roofs of the cars and it required the strictest watching to discover all who hung on the trucks and other dangerous portions of the coaches.

Just before the train was made up Attorney-General Rogers came aboard with Adjutant-General Faires and Colonel Clem Walker, of the Governor's Staff, and stated that the fight must positively not take place on Louisiana soil. At first no answer was made, but the officials were finally told that the men would not fight in that State. It was expected that troops would appear at the depot, but of the two companies in the City one could muster but 40 men, and the other only a baker's dozen. In reply to a requisition made to them by the Governor for train accommodations for troops, the Railroad officials replied that the State could not be accommodated, since all their rolling stock had been chartered. The Governor, however, was offered transportation with his men on the regular train. Donovan and Murphy were on the train when Kilrain left the City yesterday. All their baggage, Stronia water, etc., were left behind, and Kilrain had to use other water, which it was feared might hurt his condition. At 1:30 the first train with 12 coaches pulled out, and the conductor and engineer were given orders to go straight through to the battle ground without a stop. Aboard the train the information was furnished officially that both men had reached the battle ground at 6:30. There was scarcely any betting at all on the train. Passengers simply talked over the merits of the two men and slept. On the way over many shots were fired in order to frighten off stealers of rides, and the conductors found many tough characters secreted in closets and other out-of-the-way places. The discovery of one group of these non-ticket-holders almost precipitated a shooting affray, but the trouble was avoided by the ejectment of the sneaks. On the train coming over were the Chief of Police of New Orleans, the Commissioner of Public Buildings, and, in fact, most of the prominent officials of the City. The Attorney-General left the car at Slidell, and stood at the railway depot until morning, waiting for a returning train.

The ring was built about one-eighth of a mile from the railroad in a pretty spot with tall pines all around. The ground is level and covered with green turf. The ring was made of heavy ropes run through stakes deeply driven into the ground. There were square seats on the four sides of the ring.

CINCINNATI, July 8.—There is no direct wire between Cincinnati and the battle ground in Mississippi. The Western Union made no arrangement for a special wire owing to a lack of courtesy shown them by the managers. From a reliable source the news has reached here that Sullivan won in the seventy-second round and that the special train left Richburg for New-Orleans at 1:30. There will be no stop. Reports of the fight will be filed when the train reaches New-Orleans.

ST. LOUIS, July 8.—The *Post Despatch* has a special from New-Orleans which says the latest news there is that Sullivan won in the seventy-second round.

BALTIMORE, July 8.—A dispatch to the *Sun* from Cincinnati, through which place the New-Orleans wires pass, says: "Sullivan whipped Kilrain in 72 rounds. Fight ended at 1:10."

BALTIMORE, July 8.—The *American* prints the following Richburg dispatch: "The fight has ended and Sullivan was declared winner at the end of the seventy-second round. This news comes from excellent authority and is considered authentic."

ON-THE-TRAIN, July 8.—The temper of the crowd was for the best man to win. The weather was sultry and warm.

The brutal contest was witnessed by a large crowd. It is stated there was "no disturbance," a desire being shown to have "fair play on both sides."

THE LATEST.

Sullivan won in 72 rounds.

Both men have been arrested by the Sheriff.

### THE STOCK AND MONEY MARKET.

**Financial Doings on Wall-Street To-Day—The Leading Closing Quotations.**

By Telegraph to The Freeman.

NEW-YORK, July 8.—The weakness prevalent in the stock market on Saturday was renewed this morning, and notwithstanding the strength of the London market further declines extending to 1¼ per cent. were established throughout the list. First prices as compared with Saturday's closing figures were almost invariably lower and the losses extended to ⅝ per cent., with Rock Island leading and the other grangers following closely. There was an active and well distributed business in the leading shares, but St. Paul, Lake Shore, Union Pacific, Reading, New-England, Atchison and Lead Trust were most conspicuous. The early dealings also developed marked weakness and at the lowest points Sugar was 1⅝ from Saturday's figures, Lake Shore, Louis & Nashville 1½, Atchison and Union Pacific 1¼, Lead Trust 1 per cent., Lackawanna ⅞ and others smaller fractions. There was some reaction after the half hour was past and the market became more quiet, but later the downward movement was resumed. At 11 o'clock the market was fairly active and weak.

### CHIPPEWA INDIANS ARE STUBBORN.

**They Cannot be Induced by Commissioners to Leave Their Reservation.**

By Telegraph to The Freeman.

RED LAKE RESERVATION, Minn., July 8.—The Commissioners appointed to negotiate with the Chippewas for the opening of their reservation have had three councils with the Indians. Yesterday the leaders of the bands on the reservation were present. Neganmagred, who had been delegated to act as spokesman, said the plan set forth in the act of Congress was a failure. Each member of the Commission made an address, calling the attention of the Indians to the fact that they had been receiving for 10 years annually $10,000 from the Government in the form of annuities; that they were becoming poorer every year, and that the only resource open to them was to accept the liberal terms of the Government.

The Indians complained that they were blamed for the destruction of their pine lands by fire, when, as a matter of fact, the forest fires were always started by whites, and that the whites came upon their reservation and cut timber while the Indians were not allowed to leave their homes to go to the white man's country without a pass from the agent. They also objected to the money being allowed to accumulate in the United States Treasury from the sale of their lands, claiming that their lands were more valuable, and that they wished the entire benefit arising from such sales. After further explanations by the Commissioners and additional assurances on the part of the Chippewas that they regretted they could not accept the terms of the act, it was agreed that another meeting should be held to-morrow. There is little probability of the leaders changing their minds.

## *A NEW IRELAND PROJECTED.*

Some Chicago Irishmen are organizing a syndicate composed of influential men of their race, for the purpose of establishing an Irish-American republic somewhere on this continent. Commissioners are to be sent to Canada, Chili, Peru and Mexico to examine the land and obtain terms. It has already been heard from Mexico that she is willing to sell Lower California or some other state in that portion of the republic for the purpose in view. The money expended on land, improvements and necessaries will be secured by mortgage without interest, and collected from the settlers in small annual installments like rent. The money thus collected will be spent in creating an army and navy and developing the country's resources.

If such a movement has speculation at the bottom, it is not unlikely that the projectors will tire of it, as there can be no profit in it for many years. But if the inspiring motive is patriotism—a desire of Irishmen to found a country of their own where they can be free from the British yoke, there will probably be courage, determination and patience enough behind it to carry it to success. Under the very worst possible circumstances there can be no such hardships as were endured by the first settlers in New-England and New-York. There will be no savage foe to put their lives in constant peril, no harsh winters to descend upon them before shelter is prepared, no danger of famine for lack of communication with the bases of supplies, and no foreign power to tax their substance away. If the Irish people really wish to found a new empire the task will be one of less suffering and hardship than have to be undergone by those who remain in Ireland.

There would be some advantages in an independent government that the setting up of an Irish state under the United States would not secure. If it were wished to move all Ireland over in a body, there would be no laws to send back paupers, criminals, or those who come under contracts to labor. The navy would also have the right to prey upon English commerce and to maintain a state of continuous warfare with the British government. To counteract these advantages there would be the weakness of a new empire, the cost and difficulty of organizing a substantial government, the rivalries of leaders for the best places, and a system of taxation that would weigh heavily on the shoulders of a poor people for years. And until the country became strong in military and naval resources it would not command that respect that is accorded to the United States and every citizen thereof by every government in the world.

Would it not be better, therefore, to organize the new movement within the republic of the United States and subject to its constitution and laws? Would not the syndicate do wisely, while the project is on foot, to raise the money to buy enough land to settle every family in Ireland upon it, to remove the population bodily, and to start the whole colony on the road to prosperity? If the money that has been sent to Ireland during the last twenty years had been saved and kept at interest, it would do all this and much more.

The Irishman should plant himself in this country in a manner to enable him to cease all interest in Ireland except as a matter of memory and sentiment. He should not be an Irish-American but an American citizen. Then he would have no battles to fight with England over conditions from which he has forever escaped. But he cannot arrive at this happy frame of mind so long as his parents, kindred or any friend that he loves remains behind. We repeat, that the money which has been sent to Ireland in the last twenty years would have founded an Irish state in the United States and settled every family in Ireland upon it in comfortable circumstances. The drain for the next twenty years will be larger for the double reason that the wealth of Irishmen in this country is increased, and Ireland is no nearer deliverance from British power than she was twenty years ago. Why not bring Ireland to America, instead of sending all this good American money to Ireland, to go into the pockets of English landlords in the shape of rents?

## *ENGLISH CAPITAL AND AMERICAN BEER.*

Mary T. Lathrop, President of the Women's Christian Temperance Union of Michigan, at the National Prohibition Park called attention to the fact that since Mr. Harrison had become President more English capital had been invested in breweries than in all other enterprises during any other entire administration.—*Elmira Gazette.*

If Miss Lathrop and the *Gazette* will take time to look a little farther they may discover that since Mr. Harrison's inauguration an immense amount of English capital has been put into iron works, cotton and woolen mills, watch factories, furniture establishments, farming, and almost every kind of industry that can be named. To-day we have the news that English capitalists have bought several laundries and are trying to buy Delmonico's restaurant in New York. This entire movement of English capital is a practical admission that the United States under protection is a better country to do business in than England under free trade. It would have begun four years earlier if Mr. Blaine had been elected President in 1884, or even if Mr. Cleveland in his inaugural message had taken high protection ground. But it waited till the British manufacturer's last hope of free trade in this country was destroyed by the election of Harrison and a Republican Congress and the admission of four new Republican states. Then the Englishmen saw that "the jig was up," and began to cast about for some scheme to save themselves. They concluded that since the mountain had refused to come to Mahomet, Mahomet must go to the mountain. The United States had declined to go to England to buy their goods, hence they are coming to the United States.

The purchase of the breweries does not indicate that President Harrison is less of a temperance man than Mr. Cleveland was, though this would seem to be the inference of Miss Lathrop and the *Gazette*. The Englishmen could not buy unless the American brewers were willing to sell, and the large amount of sales made of brewery property by men who understand the political phases of the liquor question better than the Englishmen suggests that something has happened or is going to happen as the result of a change of administration which makes them anxious to sell out. The Englishmen, having become discouraged at the poor outlook for capital in their own country, are ready to rush into anything that promises a yearly dividend of three per cent.

## *WE EXPECTED IT!*

The Democratic Boston *Post* has made the astonishing discovery that Corporal Tanner is running the Pension office in a very extravagant manner. He recently drew $16,000,000 from the appropriation for the present fiscal year to pay off the arrearages for June, whereupon the *Post* rises to remark:

This deficit offers a measure of the reckless course which the Commissioner of Pensions has run in the three months that he has been in office. It is easy to calculate that, at this rate, by the time Congress meets he will have a big deficit already in the account of the pension bureau.

Of course the *Post* has never heard of that careful nurse of a big treasury surplus, the recent Pension Commissioner Black. It has never heard how he asked for $75,000,000 two years ago, how Congress told him it was not enough and voted him $81,000,000, and how he came out at the end of the year with a deficiency of nearly $10,000,000 which Congress made up. It has not heard how last year he again called for $75,000,000, though told by his subordinates that he needed $90,000,000, and how the Democratic Congress gave him what he asked and no more. Deficiencies are not a thing unknown to Democratic administrations, and the *Post* in its concern for the pension fund tries to display a nervousness that it does not feel. Democratic economy struck its hardest and most vicious blows at the nation's pensioners. Republican administration proposes that these men shall be paid, and will "save in something else" if necessary.

## PUBLIC OPINION.

The Republican platform of 1888 declared: "We demand the reduction of letter postage to one cent per ounce." Why not reduce it?—*Syracuse Journal.*

Hill's vetoes of the Crosby high license and the Vedder liquor tax bills cost the people of Albany at least $100,000. His vetoes of necessary appropriation bills did not save them a single dollar.—*Albany Journal.*

By the veto of the Vedder tax bill, which would have brought $2,000,000 into the State Treasury, and the high license bill, which also would have added to the finances of the state, Governor Hill put a heavy tax upon the farmers and property owners. He believes in shielding the liquor interests by taxing the farmers.—*New York Tribune.*

Kentucky is constitutionally about thirty years behind the times. That is to say, the state constitution still recognizes slavery as existing in the state, and for that reason Gov. Buckner was ashamed to file a copy of it with Kentucky's exhibit in the Paris Exposition. We had supposed that Kentucky people had heard about the late war.—*Springfield Union.*

The growing insignificance of the internal revenue bureau is illustrated by local experience. Some years ago the Troy office was the chief station in this section of the state. When collections became comparatively trivial the office was taken to Albany. Now it is to be removed to Poughkeepsie. Possibly its next removal will take it to some cross-roads centre of civilization.—*Troy Press.*

They are shouting for a resubmission of the Prohibition question in Kansas. In Atchison the war-cry is that Prohibition does not prohibit the sale of liquor, but it prohibits a public revenue from the traffic. This state of affairs has increased taxes, lowered rents, caused many houses to stand empty, and nearly ruined the city. It is the same old story, but we advise the people of Kansas to talk less and act more.—*Buffalo Express.*

The papers are all talking editorially of the brutal exhibition of the two prize-fighters now on their way to New Orleans to hammer each other's faces out of human recognition, of the disgusting sport, and lowering men to the level of brutes, etc., and in another column call attention to their readers that the best, most accurate and fullest account will appear in their respective papers.—*Providence Telegram.*

It certainly seems that something should be done in New York to stop the destruction by dropped electric wires. The city is in a state that resembles little else than a siege. Stray bombs and mortar shells could hardly be more destructive, while one could at least have the intimation of their coming by the sound. But a wire falls quickly across the crowded street, striking several people on the neck, paralyzing passing horses and blocking up traffic, and nobody seems able to enforce a remedy.—*Albany Times.*

**A Subterranean Canal.**

[From the St. Louis Globe-Democrat.]

The strangest canal in the world is one I never saw mentioned in any book or newspaper. It is a canal sixteen miles long, between Worsley and St. Helens, in the north of England, and is underground from end to end. In Lancashire the coal mines are very extensive, half the country being undermined, and many years ago the Duke of Bridgewater's managers thought they could save money by transporting the coal underground instead of on the surface. So the canal was constructed, the mines connected and drained at the same time. Ordinary canal-boats are used, but the power is furnished by men. On the roof of the tunnel-arch are cross-pieces, and the men who do the work of propulsion lie on their backs on the coal, and push with their feet against the cross-bars on the roof. Six or eight men will draw a train of four or five boats, and as there are two divisions in the tunnel boats pass each other without difficulty.

HOW REPULSIVE

Is bad breath, and yet how many otherwise attractive, polite and particular people afflict their friends with the foul odor of their breath. If there was no remedy for this it might excite our sympathy, but as there is no need of having a foul breath, it is an unpardonable breach of good manners to obtrude such an offence on good society.

Foul breath arises from disordered digestion which can be corrected by using Sulphur Bitters, and the result will be a pure, sweet breath.

## *A NEW IRELAND PROJECTED.*

Some Chicago Irishmen are organizing a syndicate composed of influential men of their race, for the purpose of establishing an Irish-American republic somewhere on this continent. Commissioners are to be sent to Canada, Chili, Peru and Mexico to examine the land and obtain terms. It has already been heard from Mexico that she is willing to sell Lower California or some other state in that portion of the republic for the purpose in view. The money expended on land, improvements and necessaries will be secured by mortgage without interest, and collected from the settlers in small annual installments like rent. The money thus collected will be spent in creating an army and navy and developing the country's resources.

If such a movement has speculation at the bottom, it is not unlikely that the projectors will tire of it, as there can be no profit in it for many years. But if the inspiring motive is patriotism—a desire of Irishmen to found a country of their own where they can be free from the British yoke, there will probably be courage, determination and patience enough behind it to carry it to success. Under the very worst possible circumstances there can be no such hardships as were endured by the first settlers in New-England and New-York. There will be no savage foe to put their lives in constant peril, no harsh winters to descend upon them before shelter is prepared, no danger of famine for lack of communication with the bases of supplies, and no foreign power to tax their substance away. If the Irish people really wish to found a new empire the task will be one of less suffering and hardship than have to be undergone by those who remain in Ireland.

There would be some advantages in an independent government that the setting up of an Irish state under the United States would not secure. If it were wished to move all Ireland over in a body, there would be no laws to send back paupers, criminals, or those who come under contracts to labor. The navy would also have the right to prey upon English commerce and to maintain a state of continuous warfare with the British government. To counteract these advantages there would be the weakness of a new empire, the cost and difficulty of organizing a substantial government, the rivalries of leaders for the best places, and a system of taxation that would weigh heavily on the shoulders of a poor people for years. And until the country became strong in military and naval resources it would not command that respect that is accorded to the United States and every citizen thereof by every government in the world.

Would it not be better, therefore, to organize the new movement within the republic of the United States and subject to its constitution and laws? Would not the syndicate do wisely, while the project is on foot, to raise the money to buy enough land to settle every family in Ireland upon it, to remove the population bodily, and to start the whole colony on the road to prosperity? If the money that has been sent to Ireland during the last twenty years had been saved and kept at interest, it would do all this and much more.

The Irishman should plant himself in this country in a manner to enable him to cease all interest in Ireland except as a matter of memory and sentiment. He should not be an Irish-American but an American citizen. Then he would have no battles to fight with England over conditions from which he has forever escaped. But he cannot arrive at this happy frame of mind so long as his parents, kindred or any friend that he loves remains behind. We repeat, that the money which has been sent to Ireland in the last twenty years would have founded an Irish state in the United States and settled every family in Ireland upon it in comfortable circumstances. The drain for the next twenty years will be larger for the double reason that the wealth of Irishmen in this country is increased, and Ireland is no nearer deliverance from British power than she was twenty years ago. Why not bring Ireland to America, instead of sending all this good American money to Ireland, to go into the pockets of English landlords in the shape of rents?

## *ENGLISH CAPITAL AND AMERICAN BEER.*

Mary T. Lathrop, President of the Women's Christian Temperance Union of Michigan, at the National Prohibition Park called attention to the fact that since Mr. Harrison had become President more English capital had been invested in breweries than in all other enterprises during any other entire administration.—*Elmira Gazette.*

If Miss Lathrop and the *Gazette* will take time to look a little farther they may discover that since Mr. Harrison's inauguration an immense amount of English capital has been put into iron works, cotton and woolen mills, watch factories, furniture establishments, farming, and almost every kind of industry that can be named. To-day we have the news that English capitalists have bought several laundries and are trying to buy Delmonico's restaurant in New York. This entire movement of English capital is a practical admission that the United States under protection is a better country to do business in than England under free trade. It would have begun four years earlier if Mr. Blaine had been elected President in 1884, or even if Mr. Cleveland in his inaugural message had taken high protection ground. But it waited till the British manufacturer's last hope of free trade in this country was destroyed by the election of Harrison and a Republican Congress and the admission of four new Republican states. Then the Englishmen saw that "the jig was up," and began to cast about for some scheme to save themselves. They concluded that since the mountain had refused to come to Mahomet, Mahomet must go to the mountain. The United States had declined to go to England to buy their goods, hence they are coming to the United States.

The purchase of the breweries does not indicate that President Harrison is less of a temperance man than Mr. Cleveland was, though this would seem to be the inference of Miss Lathrop and the *Gazette.* The Englishmen could not buy unless the American brewers were willing to sell, and the large amount of sales made of brewery property by men who understand the political phases of the liquor question better than the Englishmen suggests that something has happened or is going to happen as the result of a change of administration which makes them anxious to sell out. The Englishmen, having become discouraged at the poor outlook for capital in their own country, are ready to rush into anything that promises a yearly dividend of three per cent.

## *WE EXPECTED IT!*

The Democratic Boston *Post* has made the astonishing discovery that Corporal Tanner is running the Pension office in a very extravagant manner. He recently drew $16,000,000 from the appropriation for the present fiscal year to pay off the arrearages for June, whereupon the *Post* rises to remark:

This deficit offers a measure of the reckless course which the Commissioner of Pensions has run in the three months that he has been in office. It is easy to calculate that, at this rate, by the time Congress meets he will have a big deficit already in the account of the pension bureau.

Of course the *Post* has never heard of that careful nurse of a big treasury surplus, the recent Pension Commissioner Black. It has never heard how he asked for $75,000,000 two years ago, how Congress told him it was not enough and voted him $81,000,000, and how he came out at the end of the year with a deficiency of nearly $10,000,000 which Congress made up. It has not heard how last year he again called for $75,000,000, though told by his subordinates that he needed $90,000,000, and how the Democratic Congress gave him what he asked and no more. Deficiencies are not a thing unknown to Democratic administrations, and the *Post* in its concern for the pension fund tries to display a nervousness that it does not feel. Democratic economy struck its hardest and most vicious blows at the nation's pensioners. Republican administration proposes that these men shall be paid, and will "save in something else" if necessary.

## PUBLIC OPINION.

The Republican platform of 1888 declared: "We demand the reduction of letter postage to one cent per ounce." Why not reduce it?—*Syracuse Journal.*

Hill's vetoes of the Crosby high license and the Vedder liquor tax bills cost the people of Albany at least $100,000. His vetoes of necessary appropriation bills did not save them a single dollar.—*Albany Journal.*

By the veto of the Vedder tax bill, which would have brought $2,000,000 into the State Treasury, and the high license bill, which also would have added to the finances of the state, Governor Hill put a heavy tax upon the farmers and property owners. He believes in shielding the liquor interests by taxing the farmers.—*New York Tribune.*

Kentucky is constitutionally about thirty years behind the times. That is to say, the state constitution still recognizes slavery as existing in the state, and for that reason Gov. Buckner was ashamed to file a copy of it with Kentucky's exhibit in the Paris Exposition. We had supposed that Kentucky people had heard about the late war.—*Springfield Union.*

The growing insignificance of the internal revenue bureau is illustrated by local experience. Some years ago the Troy office was the chief station in this section of the state. When collections became comparatively trivial the office was taken to Albany. Now it is to be removed to Poughkeepsie. Possibly its next removal will take it to some cross-roads centre of civilization.—*Troy Press.*

They are shouting for a resubmission of the Prohibition question in Kansas. In Atchison the war-cry is that Prohibition does not prohibit the sale of liquor, but it prohibits a public revenue from the traffic. This state of affairs has increased taxes, lowered rents, caused many houses to stand empty, and nearly ruined the city. It is the same old story, but we advise the people of Kansas to talk less and act more.—*Buffalo Express.*

The papers are all talking editorially of the brutal exhibition of the two prize-fighters now on their way to New Orleans to hammer each other's faces out of human recognition, of the disgusting sport, and lowering men to the level of brutes, etc., and in another column call attention to their readers that the best, most accurate and fullest account will appear in their respective papers.—*Providence Telegram.*

It certainly seems that something should be done in New York to stop the destruction by dropped electric wires. The city is in a state that resembles little else than a siege. Stray bombs and mortar shells could hardly be more destructive, while one could at least have the intimation of their coming by the sound. But a wire falls quickly across the crowded street, striking several people on the neck, paralyzing passing horses and blocking up traffic, and nobody seems able to enforce a remedy.—*Albany Times.*

**A Subterranean Canal.**

[From the St. Louis Globe-Democrat.]

The strangest canal in the world is one I never saw mentioned in any book or newspaper. It is a canal sixteen miles long, between Worsley and St. Helens, in the north of England, and is underground from end to end. In Lancashire the coal mines are very extensive, half the country being undermined, and many years ago the Duke of Bridgewater's managers thought they could save money by transporting the coal underground instead of on the surface. So the canal was constructed, the mines connected and drained at the same time. Ordinary canal-boats are used, but the power is furnished by men. On the roof of the tunnel-arch are cross-pieces, and the men who do the work of propulsion lie on their backs on the coal, and push with their feet against the cross-bars on the roof. Six or eight men will draw a train of four or five boats, and as there are two divisions in the tunnel boats pass each other without difficulty.

HOW REPULSIVE

Is bad breath, and yet how many otherwise attractive, polite and particular people afflict their friends with the foul odor of their breath. If there was no remedy for this it might excite our sympathy, but as there is no need of having a foul breath, it is an unpardonable breach of good manners to obtrude such an offence on good society.

Foul breath arises from disordered digestion which can be corrected by using Sulphur Bitters, and the result will be a pure, sweet breath.

## A NEW IRELAND PROJECTED.

Some Chicago Irishmen are organizing a syndicate composed of influential men of their race, for the purpose of establishing an Irish-American republic somewhere on this continent. Commissioners are to be sent to Canada, Chili, Peru and Mexico to examine the land and obtain terms. It has already been heard from Mexico that she is willing to sell Lower California or some other state in that portion of the republic for the purpose in view. The money expended on land, improvements and necessaries will be secured by mortgage without interest, and collected from the settlers in small annual installments like rent. The money thus collected will be spent in creating an army and navy and developing the country's resources.

If such a movement has speculation at the bottom, it is not unlikely that the projectors will tire of it, as there can be no profit in it for many years. But if the inspiring motive is patriotism—a desire of Irishmen to found a country of their own where they can be free from the British yoke, there will probably be courage, determination and patience enough behind it to carry it to success. Under the very worst possible circumstances there can be no such hardships as were endured by the first settlers in New-England and New-York. There will be no savage foe to put their lives in constant peril, no harsh winters to descend upon them before shelter is prepared, no danger of famine for lack of communication with the bases of supplies, and no foreign power to tax their substance away. If the Irish people really wish to found a new empire the task will be one of less suffering and hardship than have to be undergone by those who remain in Ireland.

There would be some advantages in an independent government that the setting up of an Irish state under the United States would not secure. If it were wished to move all Ireland over in a body, there would be no laws to send back paupers, criminals, or those who come under contracts to labor. The navy would also have the right to prey upon English commerce and to maintain a state of continuous warfare with the British government. To counteract these advantages there would be the weakness of a new empire, the cost and difficulty of organizing a substantial government, the rivalries of leaders for the best places, and a system of taxation that would weigh heavily on the shoulders of a poor people for years. And until the country became strong in military and naval resources it would not command that respect that is accorded to the United States and every citizen thereof by every government in the world.

Would it not be better, therefore, to organize the new movement within the republic of the United States and subject to its constitution and laws? Would not the syndicate do wisely, while the project is on foot, to raise the money to buy enough land to settle every family in Ireland upon it, to remove the population bodily, and to start the whole colony on the road to prosperity? If the money that has been sent to Ireland during the last twenty years had been saved and kept at interest, it would do all this and much more.

The Irishman should plant himself in this country in a manner to enable him to cease all interest in Ireland except as a matter of memory and sentiment. He should not be an Irish-American but an American citizen. Then he would have no battles to fight with England over conditions from which he has forever escaped. But he cannot arrive at this happy frame of mind so long as his parents, kindred or any friend that he loves remains behind. We repeat, that the money which has been sent to Ireland in the last twenty years would have founded an Irish state in the United States and settled every family in Ireland upon it in comfortable circumstances. The drain for the next twenty years will be larger for the double reason that the wealth of Irishmen in this country is increased, and Ireland is no nearer deliverance from British power than she was twenty years ago. Why not bring Ireland to America, instead of sending all this good American money to Ireland, to go into the pockets of English landlords in the shape of rents?

## ENGLISH CAPITAL AND AMERICAN BEER.

Mary T. Lathrop, President of the Women's Christian Temperance Union of Michigan, at the National Prohibition Park called attention to the fact that since Mr. Harrison had become President more English capital had been invested in breweries than in all other enterprises during any other entire administration.—*Elmira Gazette.*

If Miss Lathrop and the *Gazette* will take time to look a little farther they may discover that since Mr. Harrison's inauguration an immense amount of English capital has been put into iron works, cotton and woolen mills, watch factories, furniture establishments, farming, and almost every kind of industry that can be named. To-day we have the news that English capitalists have bought several laundries and are trying to buy Delmonico's restaurant in New York. This entire movement of English capital is a practical admission that the United States under protection is a better country to do business in than England under free trade. It would have begun four years earlier if Mr. Blaine had been elected President in 1884, or even if Mr. Cleveland in his inaugural message had taken high protection ground. But it waited till the British manufacturer's last hope of free trade in this country was destroyed by the election of Harrison and a Republican Congress and the admission of four new Republican states. Then the Englishmen saw that "the jig was up," and began to cast about for some scheme to save themselves. They concluded that since the mountain had refused to come to Mahomet, Mahomet must go to the mountain. The United States had declined to go to England to buy their goods, hence they are coming to the United States.

The purchase of the breweries does not indicate that President Harrison is less of a temperance man than Mr. Cleveland was, though this would seem to be the inference of Miss Lathrop and the *Gazette*. The Englishmen could not buy unless the American brewers were willing to sell, and the large amount of sales made of brewery property by men who understand the political phases of the liquor question better than the Englishmen suggests that something has happened or is going to happen as the result of a change of administration which makes them anxious to sell out. The Englishmen, having become discouraged at the poor outlook for capital in their own country, are ready to rush into anything that promises a yearly dividend of three per cent.

## WE EXPECTED IT!

The Democratic Boston *Post* has made the astonishing discovery that Corporal Tanner is running the Pension office in a very extravagant manner. He recently drew $16,000,000 from the appropriation for the present fiscal year to pay off the arrearages for June, whereupon the *Post* rises to remark:

> This deficit offers a measure of the reckless course which the Commissioner of Pensions has run in the three months that he has been in office. It is easy to calculate that, at this rate, by the time Congress meets he will have a big deficit already in the account of the pension bureau.

Of course the *Post* has never heard of that careful nurse of a big treasury surplus, the recent Pension Commissioner Black. It has never heard how he asked for $75,000,000 two years ago, how Congress told him it was not enough and voted him $81,000,000, and how he came out at the end of the year with a deficiency of nearly $10,000,000 which Congress made up. It has not heard how last year he again called for $75,000,000, though told by his subordinates that he needed $90,000,000, and how the Democratic Congress gave him what he asked and no more. Deficiencies are not a thing unknown to Democratic administrations, and the *Post* in its concern for the pension fund tries to display a nervousness that it does not feel. Democratic economy struck its hardest and most vicious blows at the nation's pensioners. Republican administration proposes that these men shall be paid, and will "save in something else" if necessary.

## PUBLIC OPINION.

The Republican platform of 1888 declared: "We demand the reduction of letter postage to one cent per ounce." Why not reduce it?—*Syracuse Journal.*

Hill's vetoes of the Crosby high license and the Vedder liquor tax bills cost the people of Albany at least $100,000. His vetoes of necessary appropriation bills did not save them a single dollar.—*Albany Journal.*

By the veto of the Vedder tax bill, which would have brought $2,000,000 into the State Treasury, and the high license bill, which also would have added to the finances of the state, Governor Hill put a heavy tax upon the farmers and property owners. He believes in shielding the liquor interests by taxing the farmers.—*New York Tribune.*

Kentucky is constitutionally about thirty years behind the times. That is to say, the state constitution still recognizes slavery as existing in the state, and for that reason Gov. Buckner was ashamed to file a copy of it with Kentucky's exhibit in the Paris Exposition. We had supposed that Kentucky people had heard about the late war.—*Springfield Union.*

The growing insignificance of the internal revenue bureau is illustrated by local experience. Some years ago the Troy office was the chief station in this section of the state. When collections became comparatively trivial the office was taken to Albany. Now it is to be removed to Poughkeepsie. Possibly its next removal will take it to some cross-roads centre of civilization.—*Troy Press.*

They are shouting for a resubmission of the Prohibition question in Kansas. In Atchison the war-cry is that Prohibition does not prohibit the sale of liquor, but it prohibits a public revenue from the traffic. This state of affairs has increased taxes, lowered rents, caused many houses to stand empty, and nearly ruined the city. It is the same old story, but we advise the people of Kansas to talk less and act more.—*Buffalo Express.*

The papers are all talking editorially of the brutal exhibition of the two prize-fighters now on their way to New Orleans to hammer each other's faces out of human recognition, of the disgusting sport, and lowering men to the level of brutes, etc., and in another column call attention to their readers that the best, most accurate and fullest account will appear in their respective papers.—*Providence Telegram.*

It certainly seems that something should be done in New York to stop the destruction by dropped electric wires. The city is in a state that resembles little else than a siege. Stray bombs and mortar shells could hardly be more destructive, while one could at least have the intimation of their coming by the sound. But a wire falls quickly across the crowded street, striking several people on the neck, paralyzing passing horses and blocking up traffic, and nobody seems able to enforce a remedy.—*Albany Times.*

### A Subterranean Canal.

[From the St. Louis Globe-Democrat.]

The strangest canal in the world is one I never saw mentioned in any book or newspaper. It is a canal sixteen miles long, between Worsley and St. Helens, in the north of England, and is underground from end to end. In Lancashire the coal mines are very extensive, half the country being undermined, and many years ago the Duke of Bridgewater's managers thought they could save money by transporting the coal underground instead of on the surface. So the canal was constructed, the mines connected and drained at the same time. Ordinary canal-boats are used, but the power is furnished by men. On the roof of the tunnel-arch are cross-pieces, and the men who do the work of propulsion lie on their backs on the coal, and push with their feet against the cross-bars on the roof. Six or eight men will draw a train of four or five boats, and as there are two divisions in the tunnel boats pass each other without difficulty.

SPECIAL BUSINESS NOTICES.

HOW REPULSIVE

Is bad breath, and yet how many otherwise attractive, polite and particular people afflict their friends with the foul odor of their breath. If there was no remedy for this it might excite our sympathy, but as there is no need of having a foul breath, it is an unpardonable breach of good manners to obtrude such an offence on good society.

Foul breath arises from disordered digestion which can be corrected by using Sulphur Bitters, and the result will be a pure, sweet breath.

# WEAK WOMEN.

**Why are they Weak and Can they Become as Healthy and Vigorous as Men? Valuable Suggestions on the Subject.**

At the Madison Square Garden, New-York, recently, five women, for six days in succession, rode over 100 miles each day upon bicycles, and at the end of that time were well and strong. This proves conclusively that women have strength and endurance often equal to men. Why, then, are they called a weak race? Because they make little effort to secure strength or retain it after it has been secured. Women are pale, sallow, troubled with many weakenesses and why? Because they do not observe the laws of health and keep their bodies as they should. Their blood becomes thin and beats slowly. It should be stimulated to strong and healthy action. Cosmetics will not do this, nostrums cannot, but pure whiskies, taken as a medicine, will. If the lady of society returning from a reception or shopping expedition, will use a little pure whiskey, nature will be assisted so that instead of breaking down it will be tided over until it can recuperate. If the weary woman who is beset by work and cares will do the same thing, she, too, will be helped. Anything that assists nature helps bring health.

The importance of using only pure whiskey, cannot be too strongly urged, but there is little good and pure whiskey to be had. The only safe one to take is Duffy's. It is a Pure Malt Whiskey, free from impurities, and has been used by the most prominent men and women in America for years. It is recommended by the leading physicians, chemists, clergymen, and it merits the great popularity it has.

# THE WORLD IN MINIATURE.

## TIDINGS BY CABLE, TELEGRAPH AND MAIL TO "THE FREEMAN."

**A Persian's Woes—The Samoan Settlement—The Pope and the Powers—Portuguese and The Delagoa Railway Company—World's Peace Congress—To Protect Farmers.**

Hadje Hassein Ghooly Khan, Persian Minister to the United States, will soon leave for Europe. He tells a Washington reporter that he shall not come back, and that he has been driven out of the country by the unkind and ungenerous things written about him and his sovereign in the American newspapers. Pointing to a volume of clippings from the papers in regard to the Shah, he added: "I tell you surely, though, that I cannot bear all these things to be said about my King, who in his heart has the kindness to favor the American Minister and all the American citizens in Persia. When I arrived in this country I came by way of New-York. I saw there the Statue of Liberty Enlightening the World. I was glad, and I thought here can one live always without trouble or annoyance. Now, after being here nine months, I go away as fast as I can and like a prisoner escaping from his prison. Write that for this purpose and to say these things I resign my position as Minister from Persia, and speak as a private citizen of that country. As a Persian Minister I could not say this."

The wholesale slaughter of birds in the name of fashion is having a most remarkable effect in France. Hitherto that country has been a favorite summer home of the swallows, which each year come over from Africa, where they had spent the winter, in countless hosts. Their plumage being in great demand for milliners' uses, a few years ago a plan was devised for killing them by thousands without injuring their skins or feathers. Huge systems of electric wires, heavily charged, were stretched along the southern coast, particularly about the mouths of the Rhone, where the birds arrived in greatest numbers. Wearied by their long flight across the Mediterranean, the swallows eagerly alighted on the wires to rest, and were instantly struck dead. At last, however, they have learned wisdom, and are this year not only avoiding the deadly wires, but are shunning the shores of France and are directing their flight to more hospitable lands. Meantime, there is a great increase in the number of gnats and other insects on which they were accustomed to feed, and the Zoological Society has warned the Government that a serious calamity is impending.

A great impetus has been given to Russian industries within the last 10 or 15 years. Thus, in 1875, all the cotton mills of the country contained about 2,000,000 spindles, while there are now, according to the latest reports, upwards of 115,000,000 spindles, divided among 67 mills. The number of cotton-weaving establishments in Russia is said to be 488, giving employment to more than 80,000 hands, the total annual production being estimated at over 56,000,000 rubles. There are also 68 mills for spinning woolen yarn, employing nearly 5,000 hands, and producing goods every year valued at between 5,000,000 and 6,000,000 rubles. The carpet manufacture employs some 800 hands, with a product valued at 500,000 roubles or more; while 190 works, averaging 100 operatives each, are engaged in producing light tissues. The flax industry is also prosperous, and there are 24 spinning-mills in which 21,000 hands are employed, and which have nearly 200,000 spindles. Silk manufactures have been greatly developed and improved of late years. The province of Moscow counts about 150 silk factories, with nearly 11,000 hands. There are about 600 dyeing establishments, employing some 30,000 hands.

There is an object lesson in optimism in the condition of France to-day as compared with that of 110 years ago. Then there was not a savings bank in the country; now there are deposits in such institutions aggregating $500,000,000. Then the gross value of personal property was $60,000,000; now it is $1,600,000,000. Then the National income was $600,000,000 a year; now it is $6,000,000,000. Then land was worth on the average $40 an acre; now it is worth $135. Then there were 10,000,000 acres of wheat at 11 bushels an acre; now there are 17,500,000 acres at 18 bushels each. Then agricultural laborers got 13 cents a day; now they get 30 cents. Then it cost the Government $22,500,000 to collect a revenue of $135,000,000; now it costs $35,500,000 to collect $600,000,000. Indeed, almost the only item that shows no great change is that of direct taxation, which has risen from $726,000,000 only to $892,200,000.

Joseph Smith, Director of the Julien Electric Traction Company, Limited, of England, has just effected an amalgamation of all the storage-battery companies and the chief electric-railway companies of England, under the name of the Electric Construction Corporation, Limited. In this amalgamation are included the following companies: The Julien Electric Company, Limited, of England; the Electric Power Storage Company, Limited, owning the Faure-Sellon-Volckmar patents, as well as being the parent company and licenser of the Electrical Accumulator Company of New-York; the Elwell-Parker Company, Limited, being a large storage-battery company, of England, and the rival for years of the Electric Power Storage Company, Limited; the Electrical Railway Contractors, Limited; the Sprague patents for electric traction and transmission of power. The capital stock of this new company consists of £500,000.

This year is the centenary of the French flag, which is a tri-color, like that of the United States. On the 17th of July, 1789, Lafayette conceived the idea of placing the white emblem of royalty between the red and the blue of Paris. He thus composed a cockade which was recognized by all classes as a symbol of reconciliation and hope. A few weeks later, when Bailey receved Louis XVI. in the great hall of the Hotel de Ville, he offered him the new emblem, and the King graciously placed it in his hat. The National Guards of Paris, each body of which had a different standard, then adopted the cockade, and in 1792 the form and dimensions, as well as the colors, of this National ensign were established by law. It is expressly forbidden to use it for advertising purposes, and a law should be passed to the same effect in this country concerning the U. S. flag.

Senor Gomes, Portuguese Minister of Foreign Affairs, says that if it had not been for the assistance of the Portuguese Government the Delagoa Bay Railway Company would have forfeited its concession long ago. The official data would clearly justify the Government's action. Neither England nor America had offered any objection to the proposed arbitration on the basis fixed by a clause in the concession. England had acted in a manner that gave Portugal no ground for complaint. Everything was going on smoothly at Delagoa Bay, and all the old employes of the Railway Company had been retained.

Herbert Spencer, English philosopher, who has published many essays on a variety of subjects, writes to a friend in Chicago that the railway morals and the railway policy of the United States are in no way inferior to those of England. He thinks that the Inter-State law is an evolution of the parliamentary laws regulating trains. He asserts that the history of English railways since 1845 shows an elaborate system of tactics by which companies have been betrayed into ruinous undertakings that benefit the few at the cost of the many.

The giant diamond, lately discovered in Cape Colony, and now at the Paris Exposition, weighs 180 carats and is valued at $3,000,000. It is kept in a glass case by itself and guardians stand around it all day. At night it is placed in a big safe, which is similarly guarded all night. It is said to be of the first water, and as pure as the famous Regent in the French Crown diamonds. It is for sale.

In the Superior Criminal Court at Boston Edward Fortier and Thomas Hogan have pleaded to the indictment charging them with manslaughter in killing Charles Gibbard on Blackstone-street on the night of June 10. Fortier pleaded guilty and Hogan not guilty. The case against Hogan was nolle prossed and Fortier was sentenced to four years in the State prison.

Alonzo B. Cornell writes to the *Washington Post* to correct the prevailing impression that the scheme for a monument to General Grant in New-York has proved a fiasco. "Grant," he says, "taught us how to be patient. He knew how to wait." And the projectors of the monument are waiting. They have raised $130,000, but they are going to wait till they get $1,000,000.

President Austin Corbin of the Reading Railroad Company has given notice that the 2,800 employes of the Reading Iron Works can expect a resumption at an early day. He notifies them that none will be employed who belong to labor organizations or who indulge in strong drink. They must renounce both and sign a paper to that effect.

The Florida Legislature has passed a bill intended for the protection of farmers against worthless fertilizers. It provides for a State chemist, at a salary of $2,000, and six inspectors of fertilizers, to be located where most needed, who are to be paid in fees not to exceed $800 per annum. Penalties are attached for any violation of the law.

# WEAK WOMEN.

**Why are they Weak and Can they Become as Healthy and Vigorous as Men? Valuable Suggestions on the Subject.**

At the Madison Square Garden, New-York, recently, five women, for six days in succession, rode over 100 miles each day upon bicycles, and at the end of that time were well and strong. This proves conclusively that women have strength and endurance often equal to men. Why, then, are they called a weak race? Because they make little effort to secure strength or retain it after it has been secured. Women are pale, sallow, troubled with many weakenesses and why? Because they do not observe the laws of health and keep their bodies as they should. Their blood becomes thin and beats slowly. It should be stimulated to strong and healthy action. Cosmetics will not do this, nostrums cannot, but pure whiskies, taken as a medicine, will. If the lady of society returning from a reception or shopping expedition, will use a little pure whiskey, nature will be assisted so that instead of breaking down it will be tided over until it can recuperate. If the weary woman who is beset by work and cares will do the same thing, she, too, will be helped. Anything that assists nature helps bring health.

The importance of using only pure whiskey, cannot be too strongly urged, but there is little good and pure whisky to be had. The only safe one to take is Duffy's. It is a Pure Malt Whiskey, free from impurities, and has been used by the most prominent men and women in America for years. It is recommended by the leading physicians, chemists, clergymen, and it merits the great popularity it has.

## TIDINGS BY CABLE, TELEGRAPH AND MAIL TO "THE FREEMAN."

**A Persian's Woes—The Samoan Settlement—The Pope and the Powers—Portuguese and The Delagoa Railway Company—World's Peace Congress—To Protect Farmers.**

Hadje Hassein Ghooly Khan, Persian Minister to the United States, will soon leave for Europe. He tells a Washington reporter that he shall not come back, and that he has been driven out of the country by the unkind and ungenerous things written about him and his sovereign in the American newspapers. Pointing to a volume of clippings from the papers in regard to the Shah, he added: "I tell you surely, though, that I cannot bear all these things to be said about my King, who in his heart has the kindness to favor the American Minister and all the American citizens in Persia. When I arrived in this country I came by way of New-York. I saw there the Statue of Liberty Enlightening the World. I was glad, and I thought here can one live always without trouble or annoyance. Now, after being here nine months, I go away as fast as I can and like a prisoner escaping from his prison. Write that for this purpose and to say these things I resign my position as Minister from Persia, and speak as a private citizen of that country. As a Persian Minister I could not say this."

The wholesale slaughter of birds in the name of fashion is having a most remarkable effect in France. Hitherto that country has been a favorite summer home of the swallows, which each year come over from Africa, where they had spent the winter, in countless hosts. Their plumage being in great demand for milliners' uses, a few years ago a plan was devised for killing them by thousands without injuring their skins or feathers. Huge systems of electric wires, heavily charged, were stretched along the southern coast, particularly about the mouths of the Rhone, where the birds arrived in greatest numbers. Wearied by their long flight across the Mediterranean, the swallows eagerly alighted on the wires to rest, and were instantly struck dead. At last, however, they have learned wisdom, and are this year not only avoiding the deadly wires, but are shunning the shores of France and are directing their flight to more hospitable lands. Meantime, there is a great increase in the number of gnats and other insects on which they were accustomed to feed, and the Zoological Society has warned the Government that a serious calamity is impending.

A great impetus has been given to Russian industries within the last 10 or 15 years. Thus, in 1875, all the cotton mills of the country contained about 2,000,000 spindles, while there are now, according to the latest reports, upwards of 115,000,000 spindles, divided among 67 mills. The number of cotton-weaving establishments in Russia is said to be 488, giving employment to more than 80,000 hands, the total annual production being estimated at over 56,000,000 rubles. There are also 68 mills for spinning woolen yarn, employing nearly 5,000 hands, and producing goods every year valued at between 5,000,000 and 6,000,000 rubles. The carpet manufacture employs some 800 hands, with a product valued at 500,000 roubles or more; while 190 works, averaging 100 operatives each, are engaged in producing light tissues. The flax industry is also prosperous, and there are 24 spinning-mills in which 21,000 hands are employed, and which have nearly 200,000 spindles. Silk manufactures have been greatly developed and improved of late years. The province of Moscow counts about 150 silk factories, with nearly 11,000 hands. There are about 600 dyeing establishments, employing some 30,000 hands.

There is an object lesson in optimism in the condition of France to-day as compared with that of 110 years ago. Then there was not a savings bank in the country; now there are deposits in such institutions aggregating $500,000,000. Then the gross value of personal property was $60,000,000; now it is $1,600,000,000. Then the National income was $600,000,000 a year; now it is $6,000,000,000. Then land was worth on the average $40 an acre; now it is worth $135. Then there were 10,000,000 acres of wheat at 11 bushels an acre; now there are 17,500,000 acres at 18 bushels each. Then agricultural laborers got 13 cents a day; now they get 30 cents. Then it cost the Government $22,500,000 to collect a revenue of $135,000,000; now it costs $35,500,000 to collect $600,000,000. Indeed, almost the only item that shows no great change is that of direct taxation, which has risen from $726,000,000 only to $892,200,000.

This year is the centenary of the French flag, which is a tri-color, like that of the United States. On the 17th of July, 1789, Lafayette conceived the idea of placing the white emblem of royalty between the red and the blue of Paris. He thus composed a cockade which was recognized by all classes as a symbol of reconciliation and hope. A few weeks later, when Bailey received Louis XVI. in the great hall of the Hotel de Ville, he offered him the new emblem, and the King graciously placed it in his hat. The National Guards of Paris, each body of which had a different standard, then adopted the cockade, and in 1792 the form and dimensions, as well as the colors, of this National ensign were established by law. It is expressly forbidden to use it for advertising purposes, and a law should be passed to the same effect in this country concerning the U. S. flag.

Senor Gomes, Portuguese Minister of Foreign Affairs, says that if it had not been for the assistance of the Portuguese Government the Delagoa Bay Railway Company would have forfeited its concession long ago. The official data would clearly justify the Government's action. Neither England nor America had offered any objection to the proposed arbitration on the basis fixed by a clause in the concession. England had acted in a manner that gave Portugal no ground for complaint. Everything was going on smoothly at Delagoa Bay, and all the old employes of the Railway Company had been retained.

Herbert Spencer, English philosopher, who has published many essays on a variety of subjects, writes to a friend in Chicago that the railway morals and the railway policy of the United States are in no way inferior to those of England. He thinks that the Inter-State law is an evolution of the parliamentary laws regulating trains. He asserts that the history of English railways since 1845 shows an elaborate system of tactics by which companies have been betrayed into ruinous undertakings that benefit the few at the cost of the many.

The giant diamond, lately discovered in Cape Colony, and now at the Paris Exposition, weighs 180 carats and is valued at $3,000,000. It is said to be of the first water, and as pure as the famous Regent in the French Crown diamonds. It is for sale.

Penalties are attached for any violation of the law.

Began taking Dr. King's New Discovery for Consumption, am now on my third bottle, and able to oversee the work on my farm. It is the finest medicine ever made."

Jesse Middlewart, Decatur, Ohio, says: "Had it not been for Dr. King's New Discovery for Consumption I would have died of Lung Troubles. Was given up by doctors. Am now in best of health." Try it. Sample bottles free at VanDeusen Brothers, Rondout, and F. J. R. Clark's, Kingston, Drug Stores.

## WEAK WOMEN.

**Why are they Weak and Can they Become as Healthy and Vigorous as Men? Valuable Suggestions on the Subject.**

At the Madison Square Garden, New-York, recently, five women, for six days in succession, rode over 100 miles each day upon bicycles, and at the end of that time were well and strong. This proves conclusively that women have strength and endurance often equal to men. Why, then, are they called a weak race? Because they make little effort to secure strength or retain it after it has been secured. Women are pale, sallow, troubled with many weakenesses and why? Because they do not observe the laws of health and keep their bodies as they should. Their blood becomes thin and beats slowly. It should be stimulated to strong and healthy action. Cosmetics will not do this, nostrums cannot, but pure whiskies, taken as a medicine, will. If the lady of society returning from a reception or shopping expedition, will use a little pure whiskey, nature will be assisted so that instead of breaking down it will be tided over until it can recuperate. If the weary woman who is beset by work and cares will do the same thing, she, too, will be helped. Anything that assists nature helps bring health.

The importance of using only pure whiskey, cannot be too strongly urged, but there is little good and pure whiskey to be had. The only safe one to take is Duffy's. It is a Pure Malt Whiskey, free from impurities, and has been used by the most prominent men and women in America for years. It is recommended by the leading physicians, chemists, clergymen, and it merits the great popularity it has.

## THE WORLD IN MINIATURE.

TIDINGS BY CABLE, TELEGRAPH AND MAIL TO "THE FREEMAN."

**A Persian's Woes—The Samoan Settlement—The Pope and the Powers—Portuguese and The Delagoa Railway Company—World's Peace Congress—To Protect Farmers.**

Hadje Hassein Ghooly Khan, Persian Minister to the United States, will soon leave for Europe. He tells a Washington reporter that he shall not come back, and that he has been driven out of the country by the unkind and ungenerous things written about him and his sovereign in the American newspapers. Pointing to a volume of clippings from the papers in regard to the Shah, he added: "I tell you surely, though, that I cannot bear all these things to be said about my King, who in his heart has the kindness to favor the American Minister and all the American citizens in Persia. When I arrived in this country I came by way of New-York. I saw there the Statue of Liberty Enlightening the World. I was glad, and I thought here can one live always without trouble or annoyance. Now, after being here nine months, I go away as fast as I can and like a prisoner escaping from his prison. Write that for this purpose and to say these things I resign my position as Minister from Persia, and speak as a private citizen of that country. As a Persian Minister I could not say this."

The wholesale slaughter of birds in the name of fashion is having a most remarkable effect in France. Hitherto that country has been a favorite summer home of the swallows, which each year come over from Africa, where they had spent the winter, in countless hosts. Their plumage being in great demand for milliners' uses, a few years ago a plan was devised for killing them by thousands without injuring their skins or feathers. Huge systems of electric wires, heavily charged, were stretched along the southern coast, particularly about the mouths of the Rhone, where the birds arrived in greatest numbers. Wearied by their long flight across the Mediterranean, the swallows eagerly alighted on the wires to rest, and were instantly struck dead. At last, however, they have learned wisdom, and are this year not only avoiding the deadly wires, but are shunning the shores of France and are directing their flight to more hospitable lands. Meantime, there is a great increase in the number of gnats and other insects on which they were accustomed to feed, and the Zoological Society has warned the Government that a serious calamity is impending.

A great impetus has been given to Russian industries within the last 10 or 15 years. Thus, in 1875, all the cotton mills of the country contained about 2,000,000 spindles, while there are now, according to the latest reports, upwards of 115,000,000 spindles, divided among 67 mills. The number of cotton-weaving establishments in Russia is said to be 488, giving employment to more than 80,000 hands, the total annual production being estimated at over 56,000,000 rubles. There are also 68 mills for spinning woolen yarn, employing nearly 5,000 hands, and producing goods every year valued at between 5,000,000 and 6,000,000 rubles. The carpet manufacture employs some 800 hands, with a product valued at 500,000 roubles or more; while 190 works, averaging 100 operatives each, are engaged in producing light tissues. The flax industry is also prosperous, and there are 24 spinning-mills in which 21,000 hands are employed, and which have nearly 200,000 spindles. Silk manufactures have been greatly developed and improved of late years. The province of Moscow counts about 150 silk factories, with nearly 11,000 hands. There are about 600 dyeing establishments, employing some 30,000 hands.

There is an object lesson in optimism in the condition of France to-day as compared with that of 110 years ago. Then there was not a savings bank in the country; now there are deposits in such institutions aggregating $500,000,000. Then the gross value of personal property was $60,000,000; now it is $1,600,000,000. Then the National income was $600,000,000 a year; now it is $6,000,000,000. Then land was worth on the average $40 an acre; now it is worth $135. Then there were 10,000,000 acres of wheat at 11 bushels an acre; now there are 17,500,000 acres at 18 bushels each. Then agricultural laborers got 13 cents a day; now they get 30 cents. Then it cost the Government $22,500,000 to collect a revenue of $135,000,000; now it costs $35,500,000 to collect $600,000,000. Indeed, almost the only item that shows no great change is that of direct taxation, which has risen from $726,000,000 only to $892,200,000.

Joseph Smith, Director of the Julien Electric Traction Company, Limited, of England, has just effected an amalgamation of all the storage-battery companies and the chief electric-railway companies of England, under the name of the Electric Construction Corporation, Limited. This year is the centenary of the French flag, which is a tri-color, like that of the United States. On the 17th of July, 1789, Lafayette conceived the idea of placing the white emblem of royalty between the red and the blue of Paris. He thus composed a cockade which was recognized by all classes as a symbol of reconciliation and hope. A few weeks later, when Bailey receved Louis XVI. in the great hall of the Hotel de Ville, he offered him the new emblem, and the King graciously placed it in his hat. The National Guards of Paris, each body of which had a different standard, then adopted the cockade, and in 1792 the form and dimensions, as well as the colors, of this National ensign were established by law. It is expressly forbidden to use it for advertising purposes, and a law should be passed to the same effect in this country concerning the U. S. flag.

Senor Gomes, Portuguese Minister of Foreign Affairs, says that if it had not been for the assistance of the Portuguese Government the Delagoa Bay Railway Company would have forfeited its concession long ago. The official data would clearly justify the Government's action. Neither England nor America had offered any objection to the proposed arbitration on the basis fixed by a clause in the concession. England had acted in a manner that gave Portugal no ground for complaint. Everything was going on smoothly at Delagoa Bay, and all the old employes of the Railway Company had been retained.

Herbert Spencer, English philosopher, who has published many essays on a variety of subjects, writes to a friend in Chicago that the railway morals and the railway policy of the United States are in no way inferior to those of England. He thinks that the Inter-State law is an evolution of the parliamentary laws regulating trains. He asserts that the history of English railways since 1845 shows an elaborate system of tactics by which companies have been betrayed into ruinous undertakings that benefit the few at the cost of the many.

The giant diamond, lately discovered in Cape Colony, and now at the Paris Exposition, weighs 180 carats and is valued at $3,000,000. Penalties are attached for any violation of the law.

**The Von Beck Matter Settled—Action Taken Against a Brooklyn Railroad Company—A Store-Closing Movement—Special Term—Business in Surrogate's Court.**

The last of the numerous litigations over the estate of George F. VonBeck, for many years a large owner of down-town real estate, has been closed and settled by the parties in interest. In 1873 an action of foreclosure on a mortgage, given by VonBeck on the property known as the Masonic Hall and occupied by the First National Bank, was commenced. A judgment of foreclosure was entered in 1874. No sale of the property took place until 1881, when title to it was acquired by the Bank. A surplus was created upon the sale of about $29,000. Of this one-half belonged to the bank, and the remaining one-half was claimed by Irving VonBeck, then a minor son of Maurice Wurts VonBeck, under a trust deed from his grandfather, George F. VonBeck, executed many years ago. Other heirs of George F. VonBeck also put in claims. Before the surplus could be paid it was necessary to determine the disputed claims. In the meantime one-half of the surplus claimed by the heirs of George F. VonBeck was placed in the Bank to be held in trust, the interest to accumulate upon the same for the benefit of the parties. An order has been issued directing the surplus to be paid to Irving VonBeck as the person entitled thereto. The sum paid over, interest and principal, was $18,640, and the amount realized by Irving VonBeck after settling claims, $14,500.

In 1887 George Wilson, Arthur Williams and William Johnson—the last named being a colored man—were arrested and tried at Hudson for burglary committed in that city and sent to Clinton State Prison. Johnson died in prison. A short time before the burglary at Hudson the store of Edward P. Simmons, at Malden, Ulster County, was broken into and goods stolen. It was claimed that the three burglars mentioned perpetrated this crime. Last week, as the sentences of Wilson and Williams were about to expire, a warrant was procured from Justice Merclean, of Saugerties, and placed in the hands of Officer Abeel, of that village, who, in company with Officer Westbrook, of this City, went to the prison, and when the burglars were discharged on Saturday arrested them and brought them to the Ulster County Jail here. To-day they were taken to Saugerties for the purpose of having a hearing in the Malden burglary case.

The following business has been transacted in the Ulster Surrogate's Court: In estate of George W. LeFevre, of Rosendale, Frederick Schuman and Anthony D. Relyea appointed Appraisers. Judicial settlement of Uriah VanEtten, as Executor of Erastus Myer, of Saugerties, made and decree entered. Citations issued: To show cause why sureties should not be released and discharged in the matter of the guardianship of Rachel H., Benjamin F., James L. and Daniel H. Freer, Jr.; to prove wills of Stephen Abbey, returnable July 15; of John Brown, returnable July 16, and to prove the will of Bridget Coughlin, returnable July 17, of this City. Hearings had in the matter of proving will of Tinna and Maria Quick, E. Woolsey Haight and Peter C. Oakley, and in the final settlement of the estate of George A. Shufeldt.

The finest weather so far this summer was that of yesterday. The air was so pure that no inconvenience was experienced from heat. In the afternoon many people strolled on streets and in the suburbs. Nature presented many delights. The foliage was at its best and the fields gave out the aroma of new-mown hay. If to observe the glorious works of creation is a sin, then there were certainly many Sabbath-breakers yesterday.

### Unequal Taxation.

The *New-York Times* in commenting editorially to-day on the work of the State Assessors in Ulster County and elsewhere says:

The State Assessors are proceeding with their work of investigation in the rural counties along the Valley of the Hudson. They find everywhere very much the same chaotic state of affairs. Local Assessos declare without hesitation that they have valued property at various rates below the market value required by the law, down to as low as 30 per cent. The State officers have succeeded in making some of these gentlemen understand that if there were a uniform rate throughout the State the burden of taxation would be also proportionate, but as a rule it is hard to get admission for this fact in the local mind. Of course it is equally a fact that a uniform rate in any one county would give an equitable amount of taxation for each piece of property, but this also is difficult of comprehension. There is another element of difficulty in the case that is not usually remembered, and that is that in the present condition of agriculture in the State of New-York the value of any given piece of farming land depends very largely on the skill and intelligence of the occupant, and these are very far from uniform.

The State Assessors found that Kingston City was assessed at its full value, and one town as low as 33⅓ per cent.

### In Recorder's Court To-Day.

The case of Martin Dykleman against William Van Bramer and son was tried this afternoon. William Van Bramer, Jr., pleaded guilty to assault and was fined $10. Van-Bramer, Sr., was discharged.

### Accidents.

Word was received here on Saturday evening that William Darrow, for a long time in the employ of the Cornell Steamboat Company, had been drowned near Philadelphia. The deceased was a member of Ulster Lodge, No. 76, K. of P., Kingston Lodge, No. 516, I. O. O. F., General Grant Post G. A. R., and of the Masonic order. He served three years on the U. S. frigate "North Carolina." The Adjutant of the Post sent a telegram to Philadelphia stating that the Post would take care of the remains if desired.

# FRUIT ALONG THE HUDSON VALLEY.

**Owners of Concord Vineyards Who Fear Damage has Resulted from Mildew.**

Returns received from over 60 points in the fruit-growing districts along the Hudson Valley show that the unparalleled rainfall during the latter part of May, all through June, and the first four days of July, together with the humidity of the atmosphere, have wrought much havoc to small fruit. During the last three weeks in June rain greatly interfered with the harvesting of strawberries. The fruit became sodden on the vines and the total loss caused thereby is estimated as having been from 30 to 45 per cent. in the aggregate. Raspberries began ripening the first of this month. The bushes were heavily laden. Sunshine, however, was lacking, and the incessant rain prevented the fruit from ripening in certain localities; consequently the loss has been heavy. The bright sunshine and clear sky of the past two days have helped the crop materially. Two weeks ago the outlook was that a phenomenally large crop of Concord grapes would be gathered in September, October, and the first half of November in the vineyards along shore between Fishkill and points north of Hudson, between Cornwall and Coxsackie, along the Rondout, Esopus and Wallkill Valleys, and elsewhere. Mildew forming on the grapes has caused the producers to entertain forebodings of evil. There are owners of vineyards who say that the prospective loss may exceed 50 per cent., but that, however, to a large extent is a matter of conjecture. The gross tonnage on the vines to-day along the entire Hudson Valley exceeds the enormous crop of last year by several thousands, with the prospect that when the grapes mature the tonnage will be 10,000 in excess of any previous year. If the sun's rays are unobstructed for a week it will be possible to make a fair estimate of the loss incurred by mildew. To-day nobody knows, and one man's haphazard guess is as good as another's. The peach crop is all right, and unless some new pest appears or the atmospheric conditions during the next two weeks should prove unfavorable, the largest and the finest crop in seven years' time will be marketed. The early fruit is large in size, beautifully colored and finely flavored. The late varieties promise to be all that can be desired. The Hudson River peach has a mellowness and a fineness of fibre peculiarly its own, and the fruit was never finer than it is now.

### The Census of Ulster County.

County Clerk Wurts has received the following letter from the Census Office at Washington:

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, July 5, 1889.

*To the County Clerk of Ulster County, N. Y.:*

SIR: Inclosed you will find a printed list from the census of 1880, showing the townships into which Ulster County was divided at that time, together with the incorporated city and villages, as nearly as the Census office was able to obtain them. Will you please examine the list, note errors or changes which may have been made during the last 10 years, noting especially any additions of townships, incorporated villages, or changes in the charter limits of your City? You will, I am sure, appreciate the importance of an accurate knowledge of the civil divisions of Ulster County in laying out the coming enumeration. I trust you will answer promptly. Very respectfully,

ROBERT P. PORTER,
Superintendent of Census.

Why Engineers

Conductors, baggage masters, brakemen and all who are constantly traveling upon railroads are more or less afflicted with kidney disease is from the fact that they are constantly being shaken by the jar of the fast-running trains. It begins by pain across the small of the back extending down the inside of the leg to the knees, frequent desire to urinate dark and high-colored urine, stiff back, hate to bend over, pain when lying down, pain when standing, pain when sitting, in fact, pain, pain all the time, and unless relief is obtained Bright's Disease is sure to follow. Nothing will liven up the kidneys, regulate the urine, limber the back like the use of Brown's Sarsaparilla. Read what Conductor Anderson, of the Maine Central Railroad says: "I have used Brown's Sarsaparilla with marked effect." Road Master E. A. Smith, of the Boston & Maine system of railroads, says: "I have used Brown's Sarsaparilla for kidney troubles and can truly say it has done more for me than all the doctors I ever employed, and I have had occasion to require the services of the best physicians in the State. My wife has also been benefited by the use of

BROWN'S,

This is why railroad men use Brown's Sarsaparilla. Not genuine unless made by Ara Warren & Co., Bangor, Me.

IMPORTANT

To Blue Stone Dealers, Cement Manufacturers, Ice Dealers, Investors, and Manufacturers in Search of Sites.

PEREMPTORY SALE

Of Dock Property, Blue Stone Quarry Lands, Farm, Dwelling House and Lot, Business Office and Lots. Offers at private sale for a short time. All not disposed of privately to be sold at Public Sale on THE NEW-YORK CITY REAL ESTATE EXCHANGE.

FIRST PIECE—200 feet front dock property at Kingston, [Wilbur,] N. Y., on Rondout Creek situate between dock properties of H. Osterhoudt on the south, and Jas. J. Sweeney, occupied by George Kerr, on the north, opposite the cement works of Warren Ackerman, [formerly of J. B. James.]

SECOND PIECE.—300 feet front of dock property at same place, situate between dock properties of Jas. J. Sweeney, [formerly Booth Bros.] on the south, and Julius Osterhoudt on the north. Both of these docks are admirably suitable for the blue stone business, and are also favorably for storehouses, ice houses or sites for manufactories of any kind. These docks were formerly known as "The Hallahan Dock Property."

THIRD PIECE.—A plot of ground about 100 feet front on Abeel-street, Wilbur, and about 53 feet deep, on which is the business office of J. V. Cummings. This place lies across the street from the dock property above described and adjoins the residence property of Alderman James Purvis.

FOURTH PIECE.—A small dwelling house, [now occupied by Mrs. Coady,] situate on Abeel-street, immediately adjoining the third described piece. Size of lot 25x53 feet.

FOURTH PIECE.—The blue stone quarry, Lot No. 55, in Town Kingston, known as the "Russell Lot," adjoining quarry lots of A. VanAken, Wm. M. Hayes and P. Cahill. This lot contains large deposits of the finest blue stone and can be made to return a large revenue. 45 acre lot.

SIXTH PIECE.—The farm and blue stone quarry, Lot No. 2, in the Town of Woodstock, known as the "Britt Farm," adjoining lands of W. H. VanEtten. Size of lot 45 acres.

SEVENTH PIECE.—The Blue Stone Quarry Lot No. 57, in Town of Kingston, known as "Maginnis or Sheehan Lot," worked by David Keenan and others. Size of lot 45 acres.

The foregoing briefly described property offers a good paying investment. The several pieces netting from 7 to 17 per cent. on owners' valuation.

If wanted for business purposes possession can be given at once.

Taken as entirety, or, the dock property alone affords a splendid opportunity for the New-York dealers, or local men of enterprise to enter the blue stone business. A business that, owing to the recent and contemplated innovations by the existing management of the North River Blue Stone industry, unsatisfactory to the trade in general, offers a ready and willing market to a new concern, which, besides being profitable, would be a local public benefit, by recalling to this market dealers who now buy elsewhere.

Object of sale, to divide proceeds between joint owners.

Sale peremptory, and if not disposed of at private sale notice will be given, simultaneously in this, and the New-York papers, of the time and place of public sale.

**The Von Beck Matter Settled—Action Taken Against a Brooklyn Railroad Company—A Store-Closing Movement—Special Term—Business in Surrogate's Court.**

The last of the numerous litigations over the estate of George F. VonBeck, for many years a large owner of down-town real estate, has been closed and settled by the parties in interest. In 1873 an action of foreclosure on a mortgage, given by VonBeck on the property known as the Masonic Hall and occupied by the First National Bank, was commenced. A judgment of foreclosure was entered in 1874. No sale of the property took place until 1881, when title to it was acquired by the Bank. A surplus was created upon the sale of about $29,000. Of this one-half belonged to the bank, and the remaining one-half was claimed by Irving VonBeck, then a minor son of Maurice Wurts VonBeck, under a trust deed from his grandfather, George F. VonBeck, executed many years ago. Other heirs of George F. VonBeck also put in claims. Before the surplus could be paid it was necessary to determine the disputed claims. In the meantime one-half of the surplus claimed by the heirs of George F. VonBeck was placed in the Bank to be held in trust, the interest to accumulate upon the same for the benefit of the parties. An order has been issued directing the surplus to be paid to Irving VonBeck as the person entitled thereto. The sum paid over, interest and principal, was $18,640, and the amount realized by Irving VonBeck after settling claims, $14,500.

In 1887 George Wilson, Arthur Williams and William Johnson—the last named being a colored man—were arrested and tried at Hudson for burglary committed in that city and sent to Clinton State Prison. Johnson died in prison. A short time before the burglary at Hudson the store of Edward P. Simmons, at Malden, Ulster County, was broken into and goods stolen. It was claimed that the three burglars mentioned perpetrated this crime. Last week, as the sentences of Wilson and Williams were about to expire, a warrant was procured from Justice Merclean, of Saugerties, and placed in the hands of Officer Abeel, of that village, who, in company with Officer Westbrook, of this City, went to the prison, and when the burglars were discharged on Saturday arrested them and brought them to the Ulster County Jail here. To-day they were taken to Saugerties for the purpose of having a hearing in the Malden burglary case.

The following business has been transacted in the Ulster Surrogate's Court: In estate of George W. LeFevre, of Rosendale, Frederick Schuman and Anthony D. Relyea appointed Appraisers. Judicial settement of Uriah VanEtten, as Executor of Erastus Myer, of Saugerties, made and decree entered. Citations issued: To show cause why sureties should not be released and discharged in the matter of the guardianship of Rachel H., Benjamin F., James L. and Daniel H. Freer, Jr.; to prove wills of Stephen Abbey, returnable July 15; of John Brown, returnable July 16, and to prove the will of Bridget Coughlin, returnable July 17, of this City. Hearings had in the matter of proving will of Tinna and Maria Quick, E. Woolsey Haight and Peter C. Oakley, and in the final settlement of the estate of George A. Shufeldt.

The finest weather so far this summer was that of yesterday. The air was so pure that no inconvenience was experienced from heat. In the afternoon many people strolled on streets and in the suburbs. Nature presented many delights. The foliage was at its best and the fields gave out the aroma of new-mown hay. If to observe the glorious works of creation is a sin, then there were certainly many Sabbath-breakers yesterday.

"Sure'n they must be havin' a July picnic at the Widdy Coogan's house, Mrs. Fogarty." "And phwat makes ye think so, Mrs. Sully?" An effort is being made to close dry goods stores during the heated term every evening except on Mondays and Saturdays. It remains to be seen whether or not the "effort" made will amount to anything.

## BOATS AND BOATMEN HEREABOUT.

**The "City of Kingston" and the "Mary Powell" Made Fast Runs on Saturday.**

The steamer City of Kingston made a fast run from New-York City to Rondout on Saturday. Notwithstanding it left the Metropolis three minutes late and was detained 12 minutes by an excursion at Newburgh, its whistle was blown at the mouth of the Rondout Creek at 6 o'clock. The steamboat Mary Powell also made a fast trip, its whistle being blown long before 8 o'clock.

The steamer City of Kingston left here last night on its first Sunday trip of the season for New-York. Its state-rooms were all occupied. The steamer reached Rondout at 1:13 o'clock this afternoon.

The barge Binghamton is being loaded with 1,000 tons of coal at the "Island Dock."

## THE EXCISE BOARD MEETS ONCE MORE.

**The Members Had Nothing to Say About Remarks Made by Alms Commissioners.**

There were only a few applicants for licenses at the Board of Excise meeting this afternoon.

Nothing was said by the members in reference to the remarks made by the Alms Commissioners at their meeting on Friday evening.

The following licenses were granted:

Hotel—Frederick Bauer, corner of Railroad avenue and Thomas-street; William H. Steen, Hotel Brunswyck, Wall-street.

Ale and Beer—Joseph E. Metz, corner Union and Foxhall-avenues; Bartholomew Scott, Abeel street, Wilbur; Patrick Hogan, Abeel-street, Wilbur.

Store—E. O'Reilly, The Strand.

**Unequal Taxation.**

The *New-York Times* in commenting editorially to-day on the work of the State Assessors in Ulster County and elsewhere says:

The State Assessors are proceeding with their work of investigation in the rural counties along the Valley of the Hudson. They find everywhere very much the same chaotic state of affairs. Local Assessors declare without hesitation that they have valued property at various rates below the market value required by the law, down to as low as 30 per cent. The State officers have succeeded in making some of these gentlemen understand that if there were a uniform rate throughout the State the burden of taxation would be also proportionate, but as a rule it is hard to get admission for this fact in the local mind. Of course it is equally a fact that a uniform rate in any one county would give an equitable amount of taxation for each piece of property, but this also is difficult of comprehension. There is another element of difficulty in the case that is not usually remembered, and that is that in the present condition of agriculture in the State of New-York the value of any given piece of farming land depends very largely on the skill and intelligence of the occupant, and these are very far from uniform.

The State Assessors found that Kingston City was assessed at its full value, and one town as low as 33⅓ per cent.

**In Recorder's Court To-Day.**

The case of Martin Dykleman against William Van Bramer and son was tried this afternoon. William Van Bramer, Jr., pleaded guilty to assault and was fined $10. Van Bramer, Sr., was discharged.

On complaint of Officer McGuire John Coons, tramp, was sentenced to 30 days in the Ulster County Jail.

Anthony Ziqlwiski charged Ashrol Kiazwiski with assault. A warrant was issued for Kiazwiski.

Anna Bella Elting, colored, of Poughkeepsie, disorderly person, Albany Penitentiary, six months.

Sidney Smith, charged with disorderly conduct and insulting people, case adjourned.

George Terrance, of Poughkeepsie, intoxicated, 10 days in the Ulster County Jail.

Charles Johnson, colored, disorderly conduct, $5.

**Accidents.**

Word was received here on Saturday evening that William Darrow, for a long time in the employ of the Cornell Steamboat Company, had been drowned near Philadelphia. The deceased was a member of Ulster Lodge, No. 76, K. of P., Kingston Lodge, No. 516, I. O. O. F., General Grant Post G. A. R., and of the Masonic order. He served three years on the U. S. frigate "North Carolina." The Adjutant of the Post sent a telegram to Philadelphia stating that the Post would take care of the remains if desired.

A small boy named Isaac Cohen, while skylarking this afternoon, fell down an elevator shaft here, a distance of about seven feet. He was injured.

George Geisler employed on tug Columbia fell into the hold of that vessel on Saturday afternoon. He was injured.

**Did Not Receive the List.**

City Clerk Schepmoes said this forenoon that there is an impression that he "kept" the list of licenses away from the Alms Commissioners at their meeting on Friday night. Mr. Schepmoes states that he knew nothing of the whereabouts of the list, but found a portion of it in the waste basket the next morning.

**Disturbed the Public Peace.**

A disgraceful scene was witnessed last evening by people on their way to church. Men named Burger and Ehret engaged in a fight at the junction of Pierpont and Spring-streets. Clubs and stones were used.

On Saturday evening a row occurred in a place kept by one Mrs. Strobel at Kingston Point.

**Camp Sons of Veterans.**

The annual encampment of the camp system of the Sons of Veterans of this State will be held in Peekskill on July 8, 9 and 10. The consolidation of the Camp and Post system will be effected during the encampment. Tappen Camp, of this City, will be represented.

**Man Shot at Rhinebeck.**

David Hannaburgh, a middle-aged carpenter who lives in Rhinebeck, was shot in the head and badly hurt by Philip Stall on Saturday night while in the act of peeping in at Stall's windows in that village.

**Pertinent Queries.**

Were any liquor saloons open on Sunday? Do the officers know? Can the Alms Commissioners answer? Can they say whether the law was violated?—*Poughkeepsie News-Press.*

**Real Estate Note.**

Hewitt Boice has purchased the vacant lot adjoining the Silas Davis building uptown for $3,800. Mr. Boice intends to erect a building.

J. Doctor Easton is a brainy man and his sermons were eloquently expressed and attentively listened to. His style is incisive, clear cut, hit-the-nail-on-the-head-every-time, and his delivery excellent.

The Catskill Ministerial Association convened at Woodstock this forenoon. Church plans and work were discussed by country preachers and by clergymen from large cities, who are whiling away these hot July days in the breezy mountains. ## FRUIT ALONG THE HUDSON VALLEY.

**Owners of Concord Vineyards Who Fear Damage has Resulted from Mildew.**

Returns received from over 60 points in the fruit-growing districts along the Hudson Valley show that the unparalleled rainfall during the latter part of May, all through June, and the first four days of July, together with the humidity of the atmosphere, have wrought much havoc to small fruit. During the last three weeks in June rain greatly interfered with the harvesting of strawberries. The fruit became sodden on the vines and the total loss caused thereby is estimated as having been from 30 to 45 per cent. in the aggregate. Raspberries began ripening the first of this month. The bushes were heavily laden. Sunshine, however, was lacking, and the incessant rain prevented the fruit from ripening in certain localities; consequently the loss has been heavy. The bright sunshine and clear sky of the past two days have helped the crop materially. Two weeks ago the outlook was that a phenomenally large crop of Concord grapes would be gathered in September, October, and the first half of November in the vineyards along shore between Fishkill and points north of Hudson, between Cornwall and Coxsackie, along the Rondout, Esopus and Wallkill Valleys, and elsewhere. Mildew forming on the grapes has caused the producers to entertain forebodings of evil. There are owners of vineyards who say that the prospective loss may exceed 50 per cent., but that, however, to a large extent is a matter of conjecture. The gross tonnage on the vines to-day along the entire Hudson Valley exceeds the enormous crop of last year by several thousands, with the prospect that when the grapes mature the tonnage will be 10,000 in excess of any previous year. If the sun's rays are unobstructed for a week it will be possible to make a fair estimate of the loss incurred by mildew. To-day nobody knows, and one man's haphazard guess is as good as another's. The peach crop is all right, and unless some new pest appears or the atmospheric conditions during the next two weeks should prove unfavorable, the largest and the finest crop in seven years' time will be marketed. The early fruit is large in size, beautifully colored and finely flavored. The late varieties promise to be all that can be desired. The Hudson River peach has a mellowness and a fineness of fibre peculiarly its own, and the fruit was never finer than it is now.

**The Census of Ulster County.**

County Clerk Wurts has received the following letter from the Census Office at Washington:

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
WASHINGTON, July 5, 1889.

*To the County Clerk of Ulster County, N. Y.:*

SIR: Inclosed you will find a printed list from the census of 1880, showing the townships into which Ulster County was divided at that time, together with the incorporated city and villages, as nearly as the Census office was able to obtain them. Will you please examine the list, note errors or changes which may have been made during the last 10 years, noting especially any additions of townships, incorporated villages, or changes in the charter limits of your City? You will, I am sure, appreciate the importance of an accurate knowledge of the civil divisions of Ulster County in laying out the coming enumeration. I trust you will answer promptly. Very respectfully,

ROBERT P. PORTER,
Superintendent of Census.

**Wheels and Wheelmen Hereabout.**

One young man says he will soon ride his bicycle from this City to Philadelphia. He will take the route along the line of the Delaware & Hudson Canal to Port-Jervis, then follow the Delaware River to Philadelphia.

An Ellenville bicycler, J. Terwilliger, recently made a trip from Ellenville *via* Port-Jervis into Pennsylvania. He reports the roads in fine condition.

Wheelmen say drivers of certain vehicles try to "run over" them.

Drink as little as possible on a hot day.

**July Fish Stories.**

The *Pine Plains Register* says the other day a pickerel was caught in Stissing Lake that was so large that when it was pulled out of the water in "the lake was lowered several inches."

The sons of Abram S. Hewitt propose to stock the streams in the neighborhood of Greenwood Lake with yearling trout.

**Days of Summer Recreation Here.**

The annual excursion of the Fair-Street Reformed Church will be made during the latter portion of this month to Pine Hill and the Grand Hotel.

The Sunday School of the First Reformed Church will make an excursion to Arkville, on the Ulster & Delaware Railroad, on Wednesday.

**To Give a Reception.**

At a meeting of the members of the Rondout Canoe Club on Saturday night it was decided to give a reception on Wednesday, July 10, to the lady patronesses who assisted the organization at its reception last winter.

**Cases of Prostration.**

Cases of prostration due to the intense hot weather were reported in the hay fields of Ulster County this afternoon. Thermometers in this city registered 93 in the shade.

Why Engineers

Conductors, baggage masters, brakemen and all who are constantly traveling upon railroads are more or less afflicted with kidney disease is from the fact that they are constantly being shaken by the jar of the fast-running trains. It begins by pain across the small of the back extending down the inside of the leg to the knees, frequent desire to urinate dark and high-colored urine, stiff back, hate to bend over, pain when lying down, pain when standing, pain when sitting, in fact, pain, pain all the time, and unless relief is obtained Bright's Disease is sure to follow. Nothing will liven up the kidneys, regulate the urine, limber the back like the use of Brown's Sarsaparilla. Read what Conductor Anderson, of the Maine Central Railroad says: "I have used Brown's Sarsaparilla with marked effect." Road Master E. A. Smith, of the Boston & Maine system of railroads, says: "I have used Brown's Sarsaparilla for kidney troubles and can truly say it has done more for me than all the doctors I ever employed, and I have had occasion to require the services of the best physicians in the State. My wife has also been benefited by the use of

IMPORTANT

To Blue Stone Dealers, Cement Manufacturers, Ice Dealers, Investors, and Manufacturers in Search of Sites.

PEREMPTORY SALE

Of Dock Property, Blue Stone Quarry Lands, Farm, Dwelling House and Lot, Business Office and Lots. Offers at private sale for a short time. All not disposed of privately to be sold at Public Sale on THE NEW-YORK CITY REAL ESTATE EXCHANGE.

FIRST PIECE—200 feet front dock property at Kingston, [Wilbur,] N. Y., on Rondout Creek situate between dock properties of H. Osterhoudt on the south, and Jas. J. Sweeney, occupied by George Kerr, on the north, opposite the cement works of Warren Ackerman, [formerly of J. B. James.]

SECOND PIECE.—300 feet front of dock property at same place, situate between dock properties of Jas. J. Sweeney, [formerly Booth Bros.] on the south, and Julius Osterhoudt on the north. Both of these docks are admirably suitable for the blue stone business, and are also favorably for storehouses, ice houses or sites for manufactories of any kind. These docks were formerly known as "The Hallahan Dock Property."

THIRD PIECE.—A plot of ground about 100 feet front on Abeel-street, Wilbur, and about 53 feet deep, on which is the business office of J. V. Cummings. This place lies across the street from the dock property above described and adjoins the residence property of Alderman James Purvis.

FOURTH PIECE.—A small dwelling house, [now occupied by Mrs. Coady,] situate on Abeel-street, immediately adjoining the third described piece. Size of lot 25x53 feet.

FOURTH PIECE.—The blue stone quarry, Lot No. 55, in Town Kingston, known as the "Russell Lot," adjoining quarry lots of A. VanAken, Wm. M. Hayes and P. Cahill. This lot contains large deposits of the finest blue stone and can be made to return a large revenue. 45 acre lot.

SIXTH PIECE.—The farm and blue stone quarry, Lot No. 2, in the Town of Woodstock, known as the "Britt Farm," adjoining lands of W. H. VanEtten. Size of lot 45 acres.

SEVENTH PIECE.—The Blue Stone Quarry Lot No. 57, in Town of Kingston, known as "Maginnis or Sheehan Lot," worked by David Keenan and others. Size of lot 45 acres.

The foregoing briefly described property offers a good paying investment. The several pieces netting from 7 to 17 per cent. on owners' valuation.

If wanted for business purposes possession can be given at once.

Taken as entirety, or, the dock property alone affords a splendid opportunity for the New-York dealers, or local men of enterprise to enter the blue stone business. A business that, owing to the recent and contemplated innovations by the existing management of the North River Blue Stone industry, unsatisfactory to the trade in general, offers a ready and willing market to a new concern, which, besides being profitable, would be a local public benefit, by recalling to this market dealers who now buy elsewhere.

Object of sale, to divide proceeds between joint owners.

Sale peremptory, and if not disposed of at private sale notice will be given, simultaneously in this, and the New-York papers, of the time and place of public sale.

**The Von Beck Matter Settled—Action Taken Against a Brooklyn Railroad Company—A Store-Closing Movement—Special Term—Business in Surrogate's Court.**

The last of the numerous litigations over the estate of George F. VonBeck, for many years a large owner of down-town real estate, has been closed and settled by the parties in interest. In 1873 an action of foreclosure on a mortgage, given by VonBeck on the property known as the Masonic Hall and occupied by the First National Bank, was commenced. A judgment of foreclosure was entered in 1874. No sale of the property took place until 1881, when title to it was acquired by the Bank. A surplus was created upon the sale of about $29,000. Of this one-half belonged to the bank, and the remaining one-half was claimed by Irving VonBeck, then a minor son of Maurice Wurts VonBeck, under a trust deed from his grandfather, George F. VonBeck, executed many years ago. Other heirs of George F. VonBeck also put in claims. Before the surplus could be paid it was necessary to determine the disputed claims. In the meantime one-half of the surplus claimed by the heirs of George F. VonBeck was placed in the Bank to be held in trust, the interest to accumulate upon the same for the benefit of the parties. An order has been issued directing the surplus to be paid to Irving VonBeck as the person entitled thereto. The sum paid over, interest and principal, was $18,640, and the amount realized by Irving VonBeck after settling claims, $14,500.

In 1887 George Wilson, Arthur Williams and William Johnson—the last named being a colored man—were arrested and tried at Hudson for burglary committed in that city and sent to Clinton State Prison. Johnson died in prison. A short time before the burglary at Hudson the store of Edward P. Simmons, at Malden, Ulster County, was broken into and goods stolen. It was claimed that the three burglars mentioned perpetrated this crime. Last week, as the sentences of Wilson and Williams were about to expire, a warrant was procured from Justice Mereleau, of Saugerties, and placed in the hands of Officer Abeel, of that village, who, in company with Officer Westbrook, of this City, went to the prison, and when the burglars were discharged on Saturday arrested them and brought them to the Ulster County Jail here. To-day they were taken to Saugerties for the purpose of having a hearing in the Malden burglary case.

The following business has been transacted in the Ulster Surrogate's Court: In estate of George W. LeFevre, of Rosendale, Frederick Schuman and Anthony D. Relyea appointed Appraisers. Judicial settlement of Uriah VanEtten, as Executor of Erastus Myer, of Saugerties, made and decree entered. Citations issued: To show cause why sureties should not be released and discharged in the matter of the guardianship of Rachel H., Benjamin F., James L. and Daniel H. Freer, Jr.; to prove wills of Stephen Abbey, returnable July 15; of John Brown, returnable July 16, and to prove the will of Bridget Coughlin, returnable July 17, of this City. Hearings had in the matter of proving will of Tinna and Maria Quick, E. Woolsey Haight and Peter C. Oakley, and in the final settlement of the estate of George A. Shufeldt.

The finest weather so far this summer was that of yesterday. The air was so pure that no inconvenience was experienced from heat. In the afternoon many people strolled on streets and in the suburbs. Nature presented many delights. The foliage was at its best and the fields gave out the aroma of new-mown hay. If to observe the glorious works of creation is a sin, then there were certainly many Sabbath-breakers yesterday.

"Sure'n they must be havin' a July picnic at the Widdy Coogan's house, Mrs. Fogarty." "And phwat makes ye think so, Mrs. Sully?" ## THE EXCISE BOARD MEETS ONCE MORE.

There were only a few applicants for licenses at the Board of Excise meeting this afternoon.

Nothing was said by the members in reference to the remarks made by the Alms Commissioners at their meeting on Friday evening.

The following licenses were granted:

Ale and Beer—Joseph E. Metz, corner Union and Foxhall-avenues; Bartholomew Scott, Abeel-street, Wilbur; Patrick Hogan, Abeel-street, Wilbur.

Store—E. O'Reilly, The Strand.

**Unequal Taxation.**

The *New-York Times* in commenting editorially to-day on the work of the State Assessors in Ulster County and elsewhere says:

The State Assessors are proceeding with their work of investigation in the rural counties along the Valley of the Hudson. They find everywhere very much the same chaotic state of affairs. Local Assessors declare without hesitation that they have valued property at various rates below the market value required by the law, down to as low as 30 per cent. The State officers have succeeded in making some of these gentlemen understand that if there were a uniform rate throughout the State the burden of taxation would be also proportionate, but as a rule it is hard to get admission for this fact in the local mind. Of course it is equally a fact that a uniform rate in any one county would give an equitable amount of taxation for each piece of property, but this also is difficult of comprehension. There is another element of difficulty in the case that is not usually remembered, and that is that in the present condition of agriculture in the State of New-York the value of any given piece of farming land depends very largely on the skill and intelligence of the occupant, and these are very far from uniform.

The State Assessors found that Kingston City was assessed at its full value, and one town as low as 33⅓ per cent.

## FRUIT ALONG THE HUDSON VALLEY.

**Owners of Concord Vineyards Who Fear Damage has Resulted from Mildew.**

Returns received from over 60 points in the fruit-growing districts along the Hudson Valley show that the unparalleled rainfall during the latter part of May, all through June, and the first four days of July, together with the humidity of the atmosphere, have wrought much havoc to small fruit. During the last three weeks in June rain greatly interfered with the harvesting of strawberries. The fruit became sodden on the vines and the total loss caused thereby is estimated as having been from 30 to 45 per cent. in the aggregate. Raspberries began ripening the first of this month. The bushes were heavily laden. Sunshine, however, was lacking, and the incessant rain prevented the fruit from ripening in certain localities; consequently the loss has been heavy. The bright sunshine and clear sky of the past two days have helped the crop materially. Two weeks ago the outlook was that a phenomenally large crop of Concord grapes would be gathered in September, October, and the first half of November in the vineyards along shore between Fishkill and points north of Hudson, between Cornwall and Coxsackie, along the Rondout, Esopus and Wallkill Valleys, and elsewhere. Mildew forming on the grapes has caused the producers to entertain forebodings of evil. There are owners of vineyards who say that the prospective loss may exceed 50 per cent., but that, however, to a large extent is a matter of conjecture. The gross tonnage on the vines to-day along the entire Hudson Valley exceeds the enormous crop of last year by several thousands, with the prospect that when the grapes mature the tonnage will be 10,000 in excess of any previous year. If the sun's rays are unobstructed for a week it will be possible to make a fair estimate of the loss incurred by mildew. To-day nobody knows, and one man's haphazard guess is as good as another's. The peach crop is all right, and unless some new pest appears or the atmospheric conditions during the next two weeks should prove unfavorable, the largest and the finest crop in seven years' time will be marketed. The early fruit is large in size, beautifully colored and finely flavored. The late varieties promise to be all that can be desired. The Hudson River peach has a mellowness and a fineness of fibre peculiarly its own, and the fruit was never finer than it is now.

**The Census of Ulster County.**

County Clerk Wurts has received the following letter from the Census Office at Washington:

Why Engineers

Conductors, baggage masters, brakemen and all who are constantly traveling upon railroads are more or less afflicted with kidney disease is from the fact that they are constantly being shaken by the jar of the fast-running trains. It begins by pain across the small of the back extending down the inside of the leg to the knees, frequent desire to urinate dark and high-colored urine, stiff back, hate to bend over, pain when lying down, pain when standing, pain when sitting, in fact, pain, pain all the time, and unless relief is obtained Bright's Disease is sure to follow. Nothing will liven up the kidneys, regulate the urine, limber the back like the use of Brown's Sarsaparilla. Read what Conductor Anderson, of the Maine Central Railroad says: "I have used Brown's Sarsaparilla with marked effect." Road Master E. A. Smith, of the Boston & Maine system of railroads, says: "I have used Brown's Sarsaparilla for kidney troubles and can truly say it has done more for me than all the doctors I ever employed, and I have had occasion to require the services of the best physicians in the State. My wife has also been benefited by the use of

BROWN'S,

SECOND PIECE.—300 feet front of dock property at same place, situate between dock properties of Jas. J. Sweeney, [formerly Booth Bros.] on the south, and Julius Osterhoudt on the north. Both of these docks are admirably suitable for the blue stone business, and are also favorably for storehouses, ice houses or sites for manufactories of any kind. These docks were formerly known as "The Hallahan Dock Property."

THIRD PIECE.—A plot of ground about 100 feet front on Abeel-street, Wilbur, and about 53 feet deep, on which is the business office of J. V. Cummings. This place lies across the street from the dock property above described and adjoins the residence property of Alderman James Purvis.

The foregoing briefly described property offers a good paying investment. The several pieces netting from 7 to 17 per cent. on owners' valuation.

If wanted for business purposes possession can be given at once.

Taken as entirety, or, the dock property alone affords a splendid opportunity for the New-York dealers, or local men of enterprise to enter the blue stone business. A business that, owing to the recent and contemplated innovations by the existing management of the North River Blue Stone industry, unsatisfactory to the trade in general, offers a ready and willing market to a new concern, which, besides being profitable, would be a local public benefit, by recalling to this market dealers who now buy elsewhere.

Object of sale, to divide proceeds between joint owners.

Sale peremptory, and if not disposed of at private sale notice will be given, simultaneously in this, and the New-York papers, of the time and place of public sale.
